

## HSBC Global Asset Management (UK) Limited

### Enhanced disclosure of fund charges and costs

This document aims to detail all of the costs that are incurred when you invest in an HSBC Asset Management fund. The ongoing charges figure (OCF) can be considered as the main cost – this is a direct cost you pay for fund management and all fund managers calculate this number in the same way. The other costs and charges may (or may not) impact your overall returns, so you should be aware that they exist.

**1 + 1 = 5?**

To understand how much it costs to invest in one of our funds, please don't add up the columns to calculate the 'total'.

## Charges taken from the fund over a year

### Ongoing charges figure (OCF)

The OCF is based on annual expenses for the fund. It covers all aspects of operating the fund, including fees paid for registration, custodian fees, professional fees, authorised corporate director fees, report and accounts fees, legal fees, FCA fees and independent oversight functions, such as trustee/depositary fees and auditor fees. Where the funds invest in other funds, (both open-ended and closed-ended funds where applicable) the figures include the impact of the charges made in those other funds. It does not include payments to your financial adviser and/or any other firm through which you invest. You pay for these services directly.

### Transaction costs

When a fund manager trades within the fund, the funds incur broker commissions, transfer taxes and stamp duty. Trading is necessary in order to achieve the investment objectives. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value, market sentiment and the financial market itself.

While overall costs have an impact on your returns, you shouldn't compare transaction costs between funds as an indicator of future performance. For example, if the manager incurs costs in buying shares, which then perform strongly, the net impact of the dealing could be positive. Transaction costs vary over time, from country to country (transaction costs in an emerging market are generally higher than those in more established financial markets) and depending on the types of assets. As the manager's investment decisions are not predictable, transaction costs are also not predictable.

## Occasional charges

### Pricing policy

When the fund buys or sells investments it will usually incur a cost in the form of dealing charges and any spread between the buying and selling prices of the investment. In some circumstances (for example, deals that are large relative to the size of a Fund) this may have an adverse effect on the interests of Shareholders in the Fund. This effect is referred to as "Dilution". To prevent this, we make a "dilution adjustment" to the price of a Share on the purchase and/or sale of Shares. The dilution adjustment percentage is calculated based on the estimated costs of dealing in the underlying investments, including any dealing spreads, broker commissions, transfer taxes and stamp duty.

The transaction cost figures shown take account of the dilution adjustments applied (although where the dilution adjustments applied are greater than the transaction costs incurred then the overall transaction cost is shown as zero).

We don't charge performance fees, or one off entry/exit fees on any of our UK funds.

The charges disclosed in this document are correct as at 30 April 2023 unless otherwise stated and will be updated annually.

The OCF is calculated on the funds' last accounting date. For details of the fund accounting dates please refer to the relevant Report & Accounts or the Prospectus.

Transaction costs are 'ex-ante' meaning they are a reasonable estimate of costs before they could be incurred by an investor as they are based on historic cost information.

The material contained herein is for information only and does not constitute legal, tax or investment advice or a recommendation to any reader of this material to buy or sell investments. You must not, therefore, rely on the content of this document when making any investment decisions.

This document is not intended for distribution to or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulation. This document is not and should not be construed as an offer to sell or the solicitation of an offer to purchase or subscribe to any investment.

Any views expressed were held at the time of preparation and are subject to change without notice. While any forecast, projection or target where provided is indicative only and not guaranteed in any way. HSBC Global Asset Management (UK) Limited accepts no liability for any failure to meet such forecast, projection or target.

The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may also cause the value of such investments to fluctuate. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets.

Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. Any performance information shown refers to the past and should not be seen as an indication of future returns.

To help improve our service and in the interests of security we may record and/or monitor your communication with us. HSBC Global Asset Management (UK) Limited provides information to Institutions, Professional Advisers and their clients on the investment products and services of the HSBC Group.

Approved for issue in the UK by HSBC Global Asset Management (UK) Limited, who are authorised and regulated by the Financial Conduct Authority.

HSBC Asset Management is the brand name for the asset management business of HSBC Group, which includes the investment activities provided through our local regulated entity, HSBC Global Asset Management (UK) Limited.
