Global Listed Real Assets Fund

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Asset Management (Fund Services UK) Limited

Class: Accumulation C
ISIN: GB00B84L7Q94

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** in the long term, which is a period of 5 years or more.
- To achieve its objective, the Fund will invest at least 90% of its value in listed **infrastructure securities** and listed **property-related securities**. This means the Fund will invest in the shares of companies that are listed on a stock exchange and which own, manage, and develop **infrastructure** and property, including Real Estate Investment Trusts.
- The Fund may invest up to 10% of its value in **depository receipts** and other assets that provide indirect investment in listed **infrastructure securities** and listed **property-related securities**.
- The Fund may invest up to 10% of its value in **collective investment schemes**, which in turn invest in listed **infrastructure securities**, listed **property-related securities** and/or other assets. The **collective investment schemes** may be managed or operated by the **HSBC Group**.
- The Fund may also invest in **money market instruments**, deposits and cash.
- There will be no geographical restrictions.

Use of Benchmarks

- The Fund is **actively managed** and is not managed with reference to a benchmark. The performance of the Fund will be

shown against the performance of a combination of a 70% weighting to the Dow Jones Brookfield Global Infrastructure Index and a 30% weighting to the FTSE EPRA NAREIT Developed Index.

Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**. In particular **derivatives** will be used to reduce the risk associated with movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The use of **derivatives** will be consistent with the risk profile of the Fund.
- On giving 60 days' notice to Shareholders the Fund may also use **derivatives** for broader investment purposes to help the Fund meet its objective.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Concentration Risk** The Fund may be concentrated in a limited number of securities, economic sectors and/or countries. As a result, it may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Infrastructure Risk** Infrastructure assets can be affected by a number of factors, including local and national environmental laws and regulations, disruption to services being provided and natural or terrorist disasters.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.
- Real Estate Investments Risk** Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.
