

HSBC OpenFunds

Global Responsible Multi-Asset Conservative Portfolio

Marketing communication | Monthly report 31 July 2025 | Share class Inc C

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label since the Fund has not been designed to meet the FCA's specific label requirements.

Investment objective

The Fund aims to provide growth in line with its risk profile in the long term, which is a period of five years or more. The Fund's risk profile is rated as 2 where 1 is a lower level of risk and 5 is a higher level of risk. Please see the Prospectus for an explanation of the HSBC risk levels and the sustainability characteristics of the Fund.

Investment strategy

The Fund will also incorporate sustainability characteristics and, as part of its investment approach, it will invest in assets that support at least one of the following three responsible investment aims: (1) To deliver an overall carbon intensity level that is at least 25% lower than the carbon intensity of the broader investment universe. (2) To deliver an overall Environmental, Social and Governance ('ESG') score that is higher than the broader investment universe. (3) To invest in assets focused on themes that contribute towards positive environmental and/or social outcomes. For further information on the sustainability characteristics of the Fund please refer to the SDR Consumer Facing Disclosure document and the Prospectus. The Fund is one of a range of actively managed Global Responsible Multi-Asset Portfolios offered at different risk levels. The asset allocation of each fund in the range reflects the risk level. The Fund is managed with the aim of maximising returns in line with its agreed long term risk profile therefore any potential returns are likely to be limited by the risk profile of the Fund. The exposure to each asset class may be achieved by investing in collective investment schemes, investing directly in asset classes and investing in derivatives. The Fund is not managed with reference to a benchmark.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless. The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Share class details

Key metrics

NAV per share	GBP 1.20
Performance 1 month	1.72%
Sharpe ratio 3 years	-0.20

Fund facts

UCITS V compliant	No
UK reporting fund status (UKRS)	Yes
ISA eligible	Yes
Dividend treatment	Distributing
Distribution frequency	Semi-Annually
Dividend ex-date	16 April 2025
Dividend yield ¹	1.78%
Last paid dividend	0.008391
Dealing frequency	Daily
Valuation time	12:00 United Kingdom

Share class base currency	GBP
Domicile	United Kingdom
Inception date	24 October 2018
Fund size	GBP 332,436,546
Managers	Camilla Searle Justin Turner

Fees and expenses

Minimum initial investment ²	GBP 1,000,000
Ongoing charge figure ³	0.730%

Codes

ISIN	GB00BF1H4G82
Bloomberg ticker	HSGSMCI LN
SEDOL	BF1H4G8

¹Dividend Yield: represents the ratio of distributed income over the last 12 months to the fund's current Net Asset Value.

²Please note that initial minimum subscription may vary across different distributors

³Ongoing Charges Figure is an estimate due to a change of fee structure.

Past performance does not predict future returns. The figures are calculated in the share class base currency, dividend reinvested, net of fees.

This is a marketing communication. Please refer to the prospectus and to the KID before making any final investment decisions.

For definition of terms, please refer to the Glossary QR code and Prospectus.

Prior to 01/04/2025 the fund name was Global Sustainable Multi-Asset Conservative Portfolio

Cash	4.57	1,143.43	0.29

HSBC OpenFunds offer a choice of five different risk levels, to be selected by investors depending on factors like their financial goals, time horizon and capacity for loss. Typically, the more risk investors take, the more return they would expect to see. At HSBC Asset Management, we measure risk by volatility – how sharply a Portfolio’s share price moves in any given time period (up or down). The higher the volatility, the higher the risk. The table above shows the Portfolio’s return (for the primary share class or hedged currency share class) per year over the last three years (known as annualised) and the level of volatility over the same period. This can be compared against other funds in the peer group, as defined by an independent research company*. An example of a good outcome would be that the HSBC Portfolio return is higher than the peer group’s average return and the volatility (risk taken) is lower. However investors should consider their own priorities when it comes to returns and the risk taken to achieve them.

*Morningstar Categories are used to define the peer group comprising funds they deem similar based on fund objectives and holdings. The average is a median.

Carbon intensity emissions (%)

Over the month, the average carbon intensity of the market benchmark was measured at 209.1 tCO₂e. Our investment approach resulted in a reduction of 38%, meaning the carbon intensity of the portfolio was measured at 130 tCO₂e.

ESG score distribution (%)

84% of the underlying issuers held by the fund are rated AAA-A, compared to 69% of those in the reference benchmark. The average ESG score for the underlying issuers held by the fund is 7.14, while that of the reference benchmark securities was 6.32.

Fund vs reference comparator (%)

Fund	Weight	ESG score	Carbon intensity emissions	Index	Weight	ESG score	Carbon intensity emissions
Global Corporate Bond	28.40%	2.18	12.36	Bloomberg Global Aggregate Corporates Diversified	28.52%	1.95	36.84

GEM Debt - Hard Currency	2.51%	0.11	12.58	JPM EMBI Global Diversified	2.51%	0.09	15.65

To demonstrate the performance of the fund against its sustainable investment aim the ESG and carbon intensity scores of the fund are shown compared to the scores of a reference comparator. The reference comparator represents the ESG and carbon intensity scores the fund might have achieved if it did not have a sustainable investment aim. The reference comparator is a combination of market indices that represent the asset classes held by the fund and in the same proportions (weighting) as the fund, as shown in the table above. The composition of the reference comparator varies over time in line with the asset classes and proportions held by the fund. The table above shows the top 8 asset classes contribute differently to the ESG and carbon intensity scores although it is important to consider the weighted average scores of the overall fund and those of the reference comparator.

Stewardship

Stewardship in Action – Engaging with one of Europe’s largest diversified natural resource companies

Background - The company’s reduction targets are misaligned with the 1.5 degree pathway. IIGCC’s (Institutional Investors Group on Climate Change) analysis suggests that the long-term target is aligned but short- and medium-term targets are not and that current plans to reduce coal production over the next decade are not consistent with a 1.5 degree pathway.

Key Objectives - Strengthen short term climate targets and milestones, including ending greenfield coal mining projects. Improve disclosure on how the company’s capex plans align with the goals of the Paris Agreement, as well as its own decarbonisation goals. Establish and disclose a Just Transition strategy for workers, communities and other stakeholders impact by the company’s decarbonisation goals.

Engagement - We engaged with the CEO to voice our concerns about the assumptions the company has used in its scenario analysis for the Paris-aligned scenario. At a subsequent engagement, we met the company secretary and the Head of Sustainable Development to discuss the proposal which is explained below.

Voting - We co-filed a shareholder proposal asking for improved disclosure on 1.5-degree alignment for the company’s annual general meeting. In addition, due to our concerns about the company’s management of climate-related risks, we also voted against the company’s: “Say on climate” proposal and Board chair

Risk disclosures

- Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
