WORLD SELECTION PORTFOLIOS, GLOBAL STRATEGY PORTFOLIOS AND GLOBAL RESPONSIBLE MULTI-ASSET PORTFOLIOS DISCOUNTS TO THE ANNUAL MANAGEMENT CHARGE

We operate discounts to our range of World Selection Portfolios, Global Strategy Portfolios and Global Responsible Multi-Asset Portfolios (the “Funds”).

The discounts are designed to benefit the investors in each Fund by passing on some of the economies of scale savings that are achieved when a Fund increases significantly in size. These savings may arise, for example, when the costs that are incurred by us and/or service providers, in managing and operating a Fund, remain broadly the same as the Fund increases in size.

The operation of the discounts is described in more detail below and in the HSBC OpenFunds Prospectus, but in summary discounts are applied to the Annual Management Charge (“AMC”), for certain share classes of each Fund, when the Fund reaches a certain size. The AMC is a payment to us for carrying out our duties and responsibilities in managing the Funds and is reflected in the Funds’ daily share prices. Where discounts are applied, this has the effect of reducing the overall charges paid by investors in that Fund.

The discounts to the AMC that apply for a Fund are based on the size of the Fund, as measured by its total Net Asset Value. Where they apply, discounts are only made to the AMC of the Income C and Accumulation C Share Classes of a Fund and no other share classes are affected. The discounts are applied in tiers with the rates determined by the proportion of a Fund’s total Net Asset Value that falls within specified ranges, as shown in the HSBC OpenFunds Prospectus. A weighted average of the overall discount rate is calculated from this and applied to the AMC. This means that only the proportion of the Fund’s NAV that falls within each range receives the applicable discount for that tier.

These are the discounts that are applicable to each of the Funds based on the Net Asset Value (NAV) of the Funds as at 15 April 2025:
