Global Strategy Sustainable Dynamic Portfolio

Marketing communication | Monthly report 31 October 2024 | Share class Acc C

Investment objective

The Fund aims to provide growth in line with its risk profile in the long term, which is a period of five years or more. The Fund's risk profile is rated as 4 where 1 is a lower level of risk and 5 is a higher level of risk. The Fund aims to invest in assets that form part of a sustainable investment strategy but may also invest in assets that do not form part of a sustainable investment strategy in order to meet the Fund's aim of providing growth in line with its risk profile. Please see the Prospectus for an explanation of the HSBC risk levels and sustainable investment strategies.

Investment strategy

This is one of a range of actively managed Global Strategy Sustainable Portfolios offered at different risk levels. The asset allocation of each fund in the range reflects the risk level. The Fund is managed with the aim of maximising returns in line with its agreed long term risk profile therefore any potential returns are likely to be limited by the risk profile of the Fund. The exposure to each asset class may be achieved by investing in collective investment schemes, investing directly in asset classes and investing in derivatives. The potential for the Fund to invest in assets that form part of a sustainable investment strategy, together with a focus on lower ongoing charges, is taken into consideration when deciding which asset classes the Fund will invest in and how the Fund achieves exposure to those asset classes. The Fund is not managed with reference to a benchmark.

Main risks

- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Stewardship

Stewardship in Action: Engagement with a European bank

Background: One of Europe’s largest banks that has drawn criticism on its climate strategy and its 2023 AGM saw disruption and protests from activists and campaign groups. We also have concerns about the company’s compliance and controls environment, with ongoing cases related to fraud and discrimination.

Key objectives: Set out approach to financing new oil and gas activities. Expand emission reduction targets to other carbon intensive sectors. Assess impacts/opportunities related to a just transition. Conduct employee sentiment survey to address concerns that a large number of employees are reluctant to report cases of misconduct or non-compliance.

Engagement process: We have been engaging with the company since 2022 and have noted rapid progress on its climate strategy. We also supported its “Say on climate” proposal in 2022. In 2023, we engaged with the company’s investor relations, debt and sustainability team 8 times. We discuss a range of issues, including the company’s disclosures, governance, net zero strategy and employee engagement. We were surprised to note in the company’s disclosure, that a significant percentage of employees said they were unwilling to report an incident of non-compliance if they noticed one, as reported in the employee sentiment a survey, a topic which we have discussed in our engagements.

Voting process: In line with our Global Voting Guidelines, in 2023, we voted against the company’s remuneration report as we considered the quantum of pay excessive.

Outcome & Next Steps: The bank has created a new governance framework for financing of coal companies and brought forward its coal exit date for all OECD nations. It has also committed to disclose its approach to engagement with clients on achieving net zero objectives, with a new framework developed in 2023

Risk disclosures

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Risk that the financial situation of the issuer of a bond or debt security deteriorates, with extreme risk that the issuer will default.
