## HSBC MSCI JAPAN ISLAMIC SCREENED UCITS ETF

a sub-fund of HSBC ETFs PLC, (the "UCITS");  
 managed by HSBC Investment Funds (Luxembourg) S.A.

Class:USD (Acc)  
 ISIN:IE0001XCFC82

## Objectives and Investment Policy

### Investment Objective:

The Fund aims to track as closely as possible the returns of the MSCI Japan Islamic Universal Screened Select Index (the Index), while integrating environmental, social and governance (ESG) metrics. The Fund will invest in or gain exposure to shares of companies which make up the Index.

### Investment Policy:

The Index is a subset of the MSCI Japan Islamic Index (Parent Index), and is made up of large and mid-cap companies (as measured by the market value of their shares) based in the Japanese equity market, that comply with Shariah investment principles, as defined by the Index Provider.

In replicating the performance of the Index, the Fund promotes certain environmental, social and/or governance (ESG) characteristics and has been categorised as an Article 8 fund for the purpose of the SFDR.

The Index is constructed by applying values- and climate-based exclusionary criteria and excludes companies with exposure to: controversial and nuclear weapons, civilian firearms, tobacco, thermal coal power, thermal coal mining, unconventional oil and gas extraction, Arctic oil and gas, palm oil, recreational cannabis and breaching the United Nations Global Compact (UNGC) principles.

The Index Provider screens all securities by applying exclusionary criteria and using the MSCI Universal Indexes methodology to select securities from the Parent Index. The Index excludes the securities with the weakest ESG profile; defines an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and re-weights securities from the free-float market cap weights of their Parent Index. The Index is rebalanced on a semi-annual basis. Please refer the Fund's Supplement for more details on ESG exclusion criteria and MSCI Universal Indexes methodology.

The Fund is passively managed and aims to invest in the shares of the companies in generally the same proportion as in the Index. There may be circumstances when it is not possible for the Fund to invest in all constituents of the Index and may gain exposure by using other Shariah compliant investments such as depositary receipts.

The Shariah committee monitors the Fund periodically and issues an annual Shariah certificate on the Fund's compliance with Shariah principles. This certificate is included in the annual report of the Fund as a confirmation of the Shariah compliance for that year. Before investing, please do check that this Fund meets your Shariah requirements, and if in any doubt please consult an adviser.

The Fund may invest up to 35% of its assets in securities from a single issuer during exceptional market conditions.

The Fund may only use Shariah-compliant foreign exchange contracts (including spot and forward contracts) for hedging purposes.

## Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

### Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

### Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
