INVESTMENT OBJECTIVES AND POLICIES

The investment objective of the Fund is to replicate the performance of the Euronext ESG Biodiversity Screened World USD Index (the “**Index**”), while minimising as far as possible the tracking error between the Fund’s performance and that of the Index. In replicating the performance of the Index, the Fund promotes certain environmental, social and/or governance characteristics (as set out in the section titled “The Index”) and has been categorised as an Article 8 fund for the purpose of the SFDR.

As further detailed in the “Index Description” section of the Supplement the Index is an equity index based on the Euronext World Index (“**Parent Index**”), which offers a representation of developed equity markets worldwide, as determined by the Index Provider. The Index employs a scoring, ratings and exclusions based approach which considers, amongst other things, the impact of a company’s activities on biodiversity, together with a number of ESG related criteria.

In seeking to achieve its investment objective, the Fund will aim to invest in the constituents of the Index in generally the same proportions in which they are included in the Index. The Fund promotes certain environmental, social and/or governance characteristics (as set out in the section titled “Index Description”) Information on the Index’s characteristics and the determination of sustainable investments is set out under the section titled “Index Description” below.

However, there may be circumstances when it is not possible or practicable for the Fund to invest in all constituents of the Index. Such circumstances may include (but are not limited to): (i) a limited availability of the Index constituents; (ii) trading suspensions on constituents of the Index; (iii) cost inefficiencies; (iv) if the assets under management of the Fund are relatively small, or (v) where there are internal or regulatory driven trading restrictions (as detailed in the “Investment Restrictions” and “Investment Restrictions – Other Restrictions” sections of the Prospectus) that apply to the Fund or Investment Manager but not the Index.

As a result of not investing in some of the Index constituents, the Fund may: (i) gain exposure indirectly through other assets or instruments (including, (a) American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts which are certificates typically issued by a bank or trust company evidencing ownership of shares of a non-US issuer; (b) Eligible Collective Investment Schemes that have a similar investment objective and strategy to the Fund, including schemes managed by the Investment Manager or its affiliates; or (c) financial derivative instruments (“**FDI**”)) which, in the opinion of the Investment Manager, will assist in achieving the Fund’s investment objective and are alternatives to directly purchasing the underlying securities included in the Index and/or (ii) hold the investible Index constituents in different proportions to the Index and/or (iii) invest in securities which are not constituents of the Index which, in the opinion of the Investment Manager, are expected to provide similar performance and risk characteristics to the uninvestible Index constituents and/or (iv) hold cash or cash equivalents including money market funds which are Eligible Collective Investment Schemes. The Fund may not invest more than 10% of its net assets in Eligible Collective Investment Schemes used for investment and/or cash management purposes.

Most of the securities in which the Fund invests will be listed or traded on Recognised Markets, as defined in the Prospectus. Accordingly, the underlying exposure is to the issuers of equity securities included in the Index. The indicative net asset value per Share of the Fund is available on at least one major market data vendor terminal such as Bloomberg, as well as on a wide range of websites that display stock market data, including www.reuters.com.

If the Fund’s assets fall below a threshold determined by the Investment Manager, the Investment Manager may consider it is no longer possible to maintain a full replication strategy and so may reduce the Fund’s exposure to certain securities in the Index. In these circumstances, the Investment Manager will aim to ensure that the Fund’s assets will replicate the returns of the Index. However, in these circumstances, the Fund may not take exposure to all securities in the Index as the Index contains too many securities to efficiently purchase and, at times, certain securities included in the Index are difficult to purchase on Recognised Markets.

The Fund may use the following FDI: futures, forwards, foreign exchange contracts (including spot and forward contracts), equity options, contracts for differences and total return swaps which may be used to reduce tracking error between the Fund's performance and that of the Index. These instruments may be used for efficient portfolio management and/or investment purposes. The primary policy of the Fund is to acquire securities included in the Index, as described above, but FDI may be used where the direct holdings of securities may not be possible or where tracking error can be better minimised by using FDI. To the extent that the Fund uses FDI, there may be a risk that the volatility of the Fund may increase. However, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank of Ireland and as described in **"Use of Financial Derivative Instruments"** in the Prospectus. Accordingly, although FDI may be inherently leveraged, the primary purpose of the use of FDI is to reduce tracking error, and, although the Fund will be leveraged as a result of its investments in FDI, the Fund's global exposure (as prescribed in the Central Bank's UCITS Regulations) relating to FDI, calculated using the commitment approach, must not exceed 100% of the Fund's total Net Asset Value. The Fund does not intend to invest in warrants, but it is possible that the Fund will hold warrants due to corporate actions.

Efficient portfolio management refers to techniques and instruments which relate to transferable securities which fulfil the following criteria: They are economically appropriate in that they are realised in a cost-effective way and investment decisions involving transactions that are entered into for one or more of the following specific aims: (i) the reduction of risk (e.g. to perform an investment hedge on a portion of a portfolio); (ii) the reduction of cost (e.g. short term cash flow management or tactical asset allocation); and (iii) the generation of additional capital or income for the Company with an appropriate level of risk, taking into account the risk profile of the Fund as described in this Supplement and the Prospectus and the general provisions of the UCITS Regulations. In particular, FDI may be used for the purpose of minimising tracking error, i.e. the risk that the Fund return varies from the Index return. Equity futures, index futures and currency futures may be used to hedge against market risk or to gain exposure to an underlying market. Forward contracts may be used to hedge or to gain exposure to an increase in the value of an asset, currency or deposit. Foreign exchange contracts may be used to convert the currency of the underlying investments of each Fund into the Base Currency and to hedge the dividends received in a currency other than the Base Currency between the ex date and the pay date. Equity options may be used to hedge or achieve exposure to a particular market instead of using a physical security. Contracts for differences and total return swaps may be used to hedge or achieve exposure to a particular stock instead of using a physical security.

The Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations and may be in a position to hold up to 35% of the Fund's Net Asset Value in one constituent of the Index issued by the same body, where necessitated to ensure accurate tracking of the index or due to exceptional market conditions (i.e. the issuer represents an unusually large portion of this market measured by the Index).

The Directors may exercise all borrowing powers of the Company in accordance with the 'Borrowing Policy' section in the Prospectus. Such borrowing will be temporary and will not exceed 10% of the Net Asset Value of the Fund.

The tracking error is the annualised standard deviation of the difference between the monthly (or daily) returns of the Fund and the Index.

A series of factors may give rise to tracking error:

- Transaction costs, operating expenses, custody costs, taxes, as a result of changes in the investments of the Fund and re-weightings of the Index, corporate actions, currency fluctuations, cash flows into and out of the Fund from dividend/reinvestments and any costs and expenses which are not taken into account in the calculation of the Index.
- Internal restrictions, such as the HSBC Global Asset Management Banned Weapons Policy (as detailed in the Prospectus section: INVESTMENT RESTRICTIONS - Other Restrictions) or other market or regulatory driven trading restrictions that apply to a Fund but not the relevant Index.

Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the returns of the Index.

The Fund is passively managed. There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced exactly.

The anticipated tracking error is the expected standard deviation of the differences between the returns of the Fund and the Index.

As at the date of this Supplement, the anticipated tracking error for the Fund is expected to be up to 0.40% in normal market conditions. Divergences between anticipated and realised tracking error will be explained in the annual report for the relevant period.

The anticipated tracking error for the Fund is not a guide to future performance.

The volatility level of the Fund will have a strong correlation to the volatility level of the Index.

Total Return Swaps, Contracts for Difference and Securities Lending

The Fund may engage in securities lending subject to the requirements of the Securities Financing Transactions Regulation, the UCITS Regulations and the Central Bank UCITS Regulations. This is more particularly described in the Prospectus under the heading "*Total Return Swaps, Contracts for Difference and Securities Lending*". Up to 30% of the Fund's net assets may be subject to securities lending arrangements at any one time, however the amount subject to securities lending arrangements is not generally expected to exceed 0 – 25% of the Fund's net assets. Furthermore, the Fund may invest up to 10% of its net assets in total return swaps and contracts for difference, however such investments are not generally expected to exceed 5% of the Fund's net assets.

Position and recommendation DOC-2020-03 of the French Autorité des Marchés Financiers – Minimum Rate of Non-Financial Analysis

More than 90% of issuers held in the Fund are rated or analysed in accordance with the ESG criteria of the Index. This coverage rate may not consider certain instruments held by the Fund, as permitted under position No.2 of the position and recommendation DOC-2020-03 of the French Autorité des Marchés Financiers.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described under "**Risk Factors**" in the Prospectus and the specific risk factors set out below. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisors before making an application for Shares. Investment in the Fund is not for investors who cannot afford to lose all or a significant part of their investment.

An investor should consider his/her personal tolerance for the daily fluctuations of the market before investing in the Fund.

FDI

In the event the Fund uses FDI for efficient portfolio management or investment purposes, such use may increase the risk profile of the Fund.

For information in relation to the risks associated with the use of FDI, please refer to the "**Risk Factors – Particular Risks of Financial Derivative Instruments**" section of the Prospectus.

The Index

An investment in the Fund exposes an investor to the market risks associated with fluctuations in the Index and the value of securities comprised in the Index. The value of the Index can increase as well as decrease and the value of an investment will fluctuate accordingly. There is no guarantee that the Fund's investment objective will be achieved. The Fund is subject to tracking error, as described in the Prospectus, which is the risk that its returns may not correlate accurately to those of the Index. Furthermore, any re-weighting of the Index may increase the risk of tracking error.

The past performance of the Index should not be seen as an indication of the future performance of the Index or the Fund.

CONVERSIONS

A conversion request will be treated as a cash redemption request in respect of the original Class of Shares and as a cash subscription application in respect of the new Class of Shares in this Fund or in any other sub-fund of the Company. On this basis and provided the original Class of Shares and the new Class of Shares have the same base currency, Shareholders will be entitled on any Dealing Day to apply to convert any or all of their Shares of any Class in the Fund into Shares of another Class in the Fund or any other sub-fund of the Company except where dealings in the relevant Shares have been temporarily suspended in the circumstances described in the Prospectus and where the Dealing Deadlines are different for the Class of Shares in the sub-funds of the Company being converted. Please refer to the terms and conditions regarding subscriptions and redemptions of the relevant Fund Supplements.

When requesting the conversion of Shares as an initial investment in a sub-fund of the Company, Shareholders should ensure that the aggregate Net Asset Value per Share of the Shares converted is equal to or exceeds any minimum holding for the relevant sub-fund. In the case of a conversion of a partial holding only, the value of the remaining holding must also be at least equal to any minimum holding for the relevant sub-fund. If the number of Shares of the new Class to be issued on conversion is not an integral number of Shares, the Company may issue fractional Shares of the new Class or return the surplus arising to the Shareholder seeking to convert the Shares of the original Class.

Conversions will attract a Conversion Transaction Fee, being the fee payable to the Administrator as agent for the Company where, as part of a conversion of Shares, Shares are redeemed for cash and subsequently invested for cash in a different sub-fund of the Company. The fee payable is deducted from the redemption proceeds at the same rate as the Conversion Transaction Fee as specified in the relevant Fund Supplement of the subscribed for sub-fund.

REDEMPTIONS

Settlement for cash transactions will take place in accordance with the Prospectus and settlement of in-kind transactions will take place within 10 Business Days of the relevant Dealing Day.

As per the provisions set out in the Prospectus, redemptions proceeds (in-kind and/or in cash) will only be released where the Administrator holds full original anti-money laundering documentation.

INDEX DESCRIPTION

This section is a summary of the principal features of the Euronext ESG Biodiversity Screened World USD Index (the “Index”) and is not a complete description of the Index.

General

The Fund will aim to replicate the net total return performance of the Index.

The Index is an equity index based on the Parent Index, which offers a representation of developed equity markets worldwide, as determined by the Index Provider. The Index employs a scoring, ratings and exclusions based approach which considers, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score*), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index seeks to exclude companies which are deemed to have the worst impact on biodiversity, within their sector.

The Index is constructed from the Parent Index (c.1500 stocks) by excluding securities of companies with any of the following characteristics (each criteria will apply thresholds, as defined by the Index Provider and set out in the Index methodology and which may be amended from time to time):

- Companies with a free float market capitalisation of less than 2 billion Euro;
- Companies with Corporate Biodiversity Footprint scores* of 5 or 6 (with 6 being the worst score), or unscored;
- Companies among the worst 25% ESG Risk score* (from the starting universe);
- Companies identified as involved in:
 - the production and/or distribution of tobacco;
 - thermal coal extraction and/or electricity generation;
 - oil sands extraction;
 - shale energy extraction;
 - oil & gas exploration and/or production;
 - electricity generation from oil & gas;
 - nuclear power production;
 - production and/or distribution of civilian fire arms;
 - providing core weapons systems, or components/services that are considered tailor made and essential for banned and controversial weapons (including antipersonnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
 - animal testing;
 - pesticide production;
 - palm oil production and/or distribution;
 - whale meat production;
 - involvement in incidents which have a negative environmental impact;
 - owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and

- the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials;
- Companies considered to have breached one or more of the UNGC principles (widely accepted sustainability principles covering human rights, labour, environment and anticorruption);

The remaining companies in the Parent Index after the application of the above exclusionary criteria are eligible for inclusion in the Index. The eligible companies are ranked by free float market capitalisation, with the 500 highest ranked companies being selected for the Index. In case less than 500 companies are eligible after the eligibility screenings, all remaining companies are selected for the index.

The composition of the Index is rebalanced on a quarterly basis and carried out according to the published rules governing the management of the Index as set out by Euronext Paris.

Publication of the Index

The index is calculated based on the most recent prices of transactions concluded on the main markets in each of the countries that are included in the index. Further information about the Index, its components, its rebalancing frequency and its performance is available at: live.euronext.com.

The Index methodology may be amended from time to time by the Index Provider. Information on the Index methodology is available on the website above.

* Investors should note that there are methodological constraints and limits to the Corporate Biodiversity Footprint methodology. Further information relating to Iceberg Data Lab's Corporate Biodiversity Footprint score can be found in the Index Provider's "ESG Providers Methodologies Rulebook" which can be found at <https://live.euronext.com/en/products-indices/index-rules>. The rulebook also contains further information on the ESG Risk score (provided by Sustainalytics).
