INVESTMENT OBJECTIVE AND POLICY

Investment Objective: To achieve regular income and capital growth.

Investment Policy: To track the performance of the Index, while minimising as far as possible the Tracking Error between the Sub-Fund performance and that of the Index.

The Sub-Fund may invest in fixed income securities which are Index constituents (as described under the Index section below).

If the overall portfolio matches the characteristics of the Index, the Sub-Fund may also invest in assets which are not Index constituents for the purpose of assisting in tracking the Index, including: 1) securities which are no longer or not yet part of the Index, or other securities that provide similar performance and risk profile to securities in the Index; 2) cash and money market instruments including bills, commercial paper and certificates of deposits for ancillary liquidity purposes; and 3) units or shares of CIS for hedging EPM and cash management purposes.

Credit Ratings of the underlying securities may vary from time to time. The average Credit Rating of the investments comprising the Sub-Fund's portfolio is expected to be approximate to the average Credit Rating of those comprising the Index.

With the exception of permitted investments in unlisted securities or over-the-counter derivative instruments, the securities in which the Sub-Fund invests will be listed or traded on the China Interbank Bond Market. When investing in the China Interbank Bond Market, the Sub-Fund will invest via Bond Connect only and the Sub-Fund may invest up to 100% of its NAV via Bond Connect. Further details on permitted investments are given in Section "Appendix 1 – UCITS Investment Restrictions" in the Prospectus.

The Sub-Fund is currently registered for retail distribution in Hong Kong and accordingly it is required to make certain disclosures and set certain limits. The relevant disclosures and limits which apply to the Sub-Fund are:

- The Sub-Fund may invest up to 100% of its NAV in Non-Investment Grade and/or unrated debt securities.
- The Sub-Fund may invest more than 10% and up to 100% of its NAV in government debt securities issued and/or guaranteed by a single sovereign issuer (the PRC) which may be Non-Investment Grade or unrated. Such investments will be in accordance with the restrictions set out in Section "Appendix 1 – UCITS Investment Restrictions" in the Prospectus. Such investments are made by reference to the Index weightings. Please note the credit rating of the PRC may change from time to time.

Investment Approach: The Sub-Fund will use Replication techniques which will aim to hold all the issuers of the Index in generally the same proportions in which they are included in the Index (subject to any applicable regulatory limits). Further detail on Replication for replicating fixed income Sub-Funds is set out under the Section "Investment Techniques" of this Supplement.

In order to replicate the Index, the Sub-Fund may invest up to 20% of its NAV in fixed income securities issued by the same non-government issuer. This limit may be raised to 35% for a single non-government issuer when exceptional market conditions apply (as set out in the Prospectus under the Section "Index Tracking Risk").

Derivatives: The Sub-Fund does not intend to use FDI extensively and is not expected to have an above average risk profile as a result of its use of or investment in FDI. The usage of FDIs and EPM techniques applicable to the Sub-Fund are set out in the Prospectus in the Section "Use of Financial Derivative Instruments".

The FDIs which the Sub-Fund may use are financial futures, foreign exchange contracts (including spot and forward contracts) and credit default swaps.

Financial futures may be used for duration management which allows the Sub-Fund to track, as closely as possible, the sensitivity of the Index's underlying asset prices to movements in yields. Foreign exchange contracts may be used for share class currency hedging and credit default swaps may be used for credit exposure management to enable the Sub-Fund to track closely the overall credit risk of the Index.

It is the intention of the Sub-Fund that all of the above FDIs will be used for hedging and EPM purposes only with the objective to reduce the tracking error between the Sub-Fund's performance and that of the Index.

Securities Financing Transactions and/or Total Return Swaps: The Sub-Fund may engage in securities lending subject to the requirements of the Securities Financing Transactions Regulation, the UCITS Regulations and the Central Bank UCITS Regulations. This is more particularly described in the Prospectus under Section "Portfolio Investment Techniques". Less than 30% of the Sub-Fund's net assets may be subject to securities lending arrangements at any one time, however the amount subject to securities lending arrangements is generally expected to range from 0% to 25% of the Sub-Fund's net assets. Subject to the limitations referred to above, any of the assets of the Sub-Fund may be subject to Securities Financing Transactions.

The Sub-Fund will not enter into Total Return Swaps or Securities Financing Transactions, other than securities lending.

Investment in Funds: The Sub-Fund will not invest more than 10% of its net assets in CIS which may include units or shares of CIS that are managed directly or indirectly by the Investment Manager. Further information is provided in the Prospectus under Section "Fees, Charges and Expenses", "Costs of Investing in Units in Other Collective Investment Schemes". The Sub-Fund may invest in the units or shares of CIS which mainly invest in securities included in the Index in order to gain indirect exposure to such securities.

Tracking Error: The tracking error is the annualised standard deviation of the difference between the monthly (or daily) returns of the Sub-Fund and the Index. A series of factors may give rise to tracking error, as disclosed in the Prospectus in the Section "Tracking Error". As at the date of this Supplement, the Anticipated Tracking Error for the Sub-Fund is expected to be up to 0.20% per annum in normal market conditions.

Volatility: The Sub-Fund is expected to have medium levels of volatility.

The Sub-Fund is passively managed. There is no guarantee that the investment objective of the Sub-Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced exactly.
