

HSBC UCITS Common Contractual Fund

ISLAMIC GLOBAL EQUITY INDEX FUND

Marketing communication | Monthly report 31 July 2025 | Share class A3CGBP

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to achieve capital growth over the long term.

Investment strategy

The Fund aims to track as closely as possible the performance of the Dow Jones Islamic Market Titans 100 Index (the Index). The Fund will invest in, or gain exposure to shares of companies which make up the Index. The Index is designed to measure the performance of the largest 100 companies traded globally that pass rule-based screens for adherence to Shariah Principles. The Index Universe comprises all constituent companies of the Dow Jones Islamic Market World Index. The Index excludes shares of companies that generate more than 5% of income or revenue from the business activities such as: alcohol, tobacco, pork-related products, conventional financial services, weapons and defences, certain entertainment. The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index. The Fund will only invest in shares of companies that meet Shariah compliance principles as interpreted or approved by the Shariah Committee. The Fund may invest up to 10% of its assets in other funds and may hold cash. The Fund will not invest in funds that are themselves tax transparent vehicles. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

Risk disclosures

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
