## Objectives and Investment Policy

### Investment Objective:

The Fund aims to provide long-term capital growth and seeks to invest in instruments that offer thematic equity exposure.

### Investment Policy:

The Fund intends to achieve its investment objective by being principally a fund of funds. The investment managers have developed a proprietary investment framework (the Thematic Framework) to implement the Fund's investment objective.

The thematic equity exposures sought by each investment manager under the Thematic Framework may change over time in non-material respects. Such thematic equity exposures may include areas such as: (i) investments that seek to find solutions for climate-responsible economic growth, such as climate and energy transition, circular economy and green infrastructure, and natural resources, agriculture and water; (ii) investments linked to the rapid emergence of new technology to disrupt and enhance existing processes, such as automation, disruptive technologies and digital transformation; and (iii) investments linked to changing demographics, living conditions and expectations, such as future consumer needs, social inclusion, and health innovation. The Fund promotes certain environmental, social and/or governance characteristics by virtue of it being a fund of funds and investing at least 80% of its assets (excluding cash, money markets instruments and derivatives) in funds that are classified as Article 8 or Article 9 under SFDR, or non-EU funds that, in the opinion of the Investment Managers, that meet comparable sustainability standards. Therefore, the Fund has been categorised as an Article 8 SFDR fund for the purpose of the SFDR.

The Fund may invest up to 100% of its assets in other funds including exchange-traded funds, with up to 20% of its assets in a single fund.

The Fund may invest in shares (and securities similar to shares) of companies of any size that are listed or traded on recognised markets worldwide.

The Fund may hold up to 10% of its assets in cash and money market instruments for ancillary liquidity purposes.

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

### Why is this Fund in this specific category?

### Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
