

HSBC Global Funds ICAV

China Government Local Bond UCITS ETF

Marketing communication | Monthly report 30 November 2025 | Share class BCHGBP

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide regular income and capital growth by tracking as closely as possible the performance of the Bloomberg China Treasury + Policy Bank Index (total return) (the Index).

Investment strategy

The Index is comprised of Renminbi (CNY) denominated bonds that are listed on China Interbank Bond Market. The currency of the Index is US dollars (USD) and returns are unhedged. The Index includes fixed-rate government and policy bank bonds with a minimum outstanding amount of at least CNY 5 billion, and a maturity of at least one year. The Fund will be passively managed and will invest in CNY denominated bonds. The Fund will not necessarily invest in every Index constituent and may invest outside of the Index. The Fund may invest up to 10% in funds, up to 100% in non-investment grade bonds, up to 100% in government bonds issued by a single government issuer and up to 20% in securities issued by the same non-government issuer. The average credit ratings of the Fund's underlying investments are expected to be in-line with that of the Index. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.

Share class details

Key metrics

NAV per share	GBP 12.07
Performance 1 month	-0.25%
Yield to maturity	1.72%

Fund facts

UCITS V compliant	Yes
UK reporting fund status (UKRS)	Yes
ISA eligible	Yes
Dividend treatment	Accumulating
Dealing frequency	Daily

Risk disclosures

- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
