

HSBC Global Funds ICAV

Euro Lower Carbon Government 1-3 Year Bond UCITS ETF

Marketing communication | Monthly report 31 October 2025 | Share class SCHCHF

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide regular income and capital growth.

Investment strategy

The Fund tracks as closely as possible the performance of the Bloomberg Euro Government 1-3 Year Lower Carbon Index (the Index), while minimising the tracking error between the Fund's performance and that of the Index, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund may invest in European government bonds, agency and supranational bonds (developed and emerging markets) which are Index constituents and will not embed a derivative and/or leverage. The Index seeks to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Bloomberg Euro Aggregate 1-3 Year Treasury Bond Index (the Parent Index). The Index is based on the Bloomberg Index Methodology which applies an eligibility criteria based on a set of fundamental core design principles and also applies carbon tilt factors towards countries with lower carbon per capita levels relative to the Parent Index. The credit ratings of the Fund's underlying investments may vary from time to time. The Fund is passively managed and utilises an investment technique called optimisation. The Fund may invest in money market instruments and also may invest up to 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

Share class details

Key metrics

NAV per share	CHF 10.04
Yield to maturity	2.08%

Fund facts

UCITS V compliant	Yes
ISA eligible	Yes
Dividend treatment	Accumulating
Dealing frequency	Daily
Valuation time	23:00 Ireland
Share class base currency	CHF
Domicile	Ireland
Inception date	6 November 2024
Fund size	EUR 69,572,812
Managers	Amrita Chauhan Sanyal Cesar Felipe Fernandez Sebastien Faucher

Fees and expenses

Minimum initial investment ¹	EUR 50,000,000
Ongoing charge figure ²	0.115%

Codes

ISIN	IE0007ALDAT4
Bloomberg ticker	ERLCUSC ID
SEDOL	BPBNHK1

¹Please note that initial minimum subscription may vary across different distributors

²Ongoing Charges Figure is an estimate due to a change of fee structure.

Past performance does not predict future returns. The figures are calculated in the share class base currency, dividend reinvested, net of fees.

This is a marketing communication. Please refer to the prospectus and to the KID before making any final investment decisions.

For definition of terms, please refer to the Glossary QR code and Prospectus.

Performance figures will only be published once the share class has achieved a twelve months track record.

Risk disclosures

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
