This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long-term capital growth.

Investment strategy

The Fund usually invests a minimum of 90% of net assets in shares (or securities similar to shares) of companies incorporated in US or those that earn the majority of their revenue from US. The Fund may invest in securities similar to shares including American Depositary Receipts, Global Depositary Receipts and Non-Voting Depositary Receipts which are issued by a bank or trust company evidencing ownership of shares of a non-US issuer and are alternatives to directly purchasing the underlying securities. The Fund may invest up to 10% of its assets in other funds, including HSBC funds. The Investment Manager applies quantitative investment process to create a portfolio which focuses on risk premia offered by exposure to factors such as value, quality, momentum, low risk and size. The Fund is an actively managed and has been categorised as an Article 6 fund for the purpose of the SFDR. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
