managed by HSBC Investment Funds (Luxembourg) S.A.

Class:EUR Hedged(Acc)

Objectives and Investment Policy

Investment Objective:
The Fund aims to provide long-term capital growth.
Investment Policy:
The Fund usually invests a minimum of 90% of net assets in shares (or securities similar to shares) of companies incorporated in US or those that earn the majority of their revenue from US. The Fund may invest in securities similar to shares including American Depositary Receipts, Global Depositary Receipts and Non-Voting Depositary Receipts which are issued by a bank or trust company evidencing ownership of shares of a non-US issuer and are alternatives to directly purchasing the underlying securities. The Fund may invest up to 10% of its assets in other funds, including HSBC funds.
The Investment Manager identifies shares which may or may not comprise the reference benchmark and uses a quantitative investment process to create a portfolio which focuses on risk premia offered by exposure to factors such as value, quality, momentum, low risk and size whilst minimizing the portfolio's risk characteristics through the application of a series of constraints established relative to the reference benchmark such as country, sector and stock weights. Please refer the Fund's Supplement for more details.
The Fund has been categorised as an Article 6 fund for the purpose of the SFDR.
The Fund may also invest in derivatives for efficient portfolio management purposes (such as to manage risk and costs, or to generate additional capital or income) and for investment purposes.

- The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.
- Currency hedging is carried out in respect of the share class. The aim is to protect against exchange rate fluctuations between the share class currency EUR and the base currency of the Fund USD.
- The Fund is actively managed and does not track a benchmark. The reference benchmark for the Fund is S&P 500 Index.
- HSBC PLUS funds are actively managed rather than passively tracking an index.
- The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
- Any deviations with respect to the benchmark are monitored within a comprehensive risk framework, which includes monitoring at security, issuer, sector and country level.
- The deviation of the Fund's performance relative to the benchmark is also monitored, but not constrained, to a defined range.
- Income is reinvested.
- Authorised Participants only may deal in the Fund's shares directly with the UCITS.
- The Fund's shares are listed on one or more stock exchange(s).
- You may sell your investment on most working days.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.
- This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
