

HSBC MSCI EMERGING MARKETS ISLAMIC ESG UCITS ETF

The sub-fund will promote the following environmental and social characteristics:

In replicating the performance of the MSCI EM (Emerging Market) Islamic ESG Universal Screened Select Index (the "Index"), the Fund promotes the following environmental and/or social characteristics:

- an improvement on the ESG rating against that of the MSCI Emerging Markets Islamic Index (the "Parent Index").

The Fund seeks to achieve the promotion of these characteristics by replicating the performance of the Index which removes companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weights companies in order to improve the exposure to companies with favourable ESG ratings.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Index achieves this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the certain characteristics.
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from the Parent Index.

Do no significant harm analysis is completed by the Index provider as part of the Index construction.

Investment Strategy and Proportion of Investments:

The Fund is passively managed and will aim to replicate the net total return performance of the Index.

In seeking to achieve its investment objective, the Fund will aim to invest in the constituents of the Index in generally the same proportions in which they are included in the Index. Cash and other Shariah-compliant instruments such as financial derivative instruments ("FDI") may be used for liquidity and hedging purposes.

The Fund promotes environmental and/or social characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments.

Methodologies:

HSBC Asset Management's ESG data team leverages its proprietary data to run internal ESG reports to ensure sustainable objectives and targets, and the indicators used to measure these, as

embedded in the product's methodology, are met. Using this data HSBC Asset Management conducts regular reviews with the relevant index partner to ensure accuracy of the data being provided.

Good corporate governance has long been incorporated in HSBC Asset Management's proprietary fundamental company research. HSBC Asset Management's Stewardship team meets with companies regularly to improve our understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice. HSBC Asset Management believes that good corporate governance ensures that companies are managed in line with the long-term interests of their investors.
