

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF

a sub-fund of HSBC ETFs PLC, (the "UCITS");
 managed by HSBC Investment Funds (Luxembourg) S.A.

Class:CHF Hedged (Acc)
 ISIN:IE0009YEDMC6

Objectives and Investment Policy

Investment Objective:

The Fund aims to track as closely as possible the returns of the FTSE EPRA NAREIT Developed Index (the Index). The Fund will invest in or gain exposure to shares of companies which make up the Index.

Investment Policy:

The Index is made up of the largest stock market listed real estate companies and real estate investment trusts (REITS) of the world's developed share markets, as defined by the Index provider.

The Fund is passively managed and aims to invest in the shares of the companies in generally the same proportion as in the Index. There may be circumstances when it is not possible or practical for the Fund to invest in all constituents of the Index. If the Fund cannot invest directly in the companies that constitute the Index, it may gain exposure by using other investments such as depositary receipts, derivatives or funds.

The Fund may invest up to 35% of its assets in securities from a single issuer during exceptional market conditions.

The Fund may invest up to 10% of its assets in total return swaps and contracts for difference. However, this is not expected to exceed 5%. The Fund may invest up to 10% of its assets in other funds, including HSBC funds.

The Fund may also invest in derivatives for efficient portfolio management purposes (such as to manage risk and costs, or to generate additional capital or income), and for investment purposes.

- ◆ The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.
- ◆ Currency hedging is carried out in respect of the share class. The aim is to protect against exchange rate fluctuations between the share class currency CHF and the base currency of the Fund USD.
- ◆ The reference benchmark, shown in the past performance section, does not take account of currency hedging. There may be a greater difference between the past performance of the share class and the reference benchmark than for other share classes in the Fund.
- ◆ Income is reinvested.
- ◆ Authorised Participants only may deal in the Fund's shares directly with the UCITS.
- ◆ The Fund's shares are listed on one or more stock exchange(s).
- ◆ You may sell your investment on most working days.
- ◆ Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.
- ◆ This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ◆ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- ◆ **Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
- ◆ **Real Estate Investments Risk** Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.25%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Past Performance

- ◆ No entry nor exit charges are payable where investors deal in shares in the secondary market – i.e. where shares are purchased and sold on a stock exchange. In such cases, investors may pay fees charged by their broker. Authorised Participants dealing directly with the Fund may be subject to a Direct Dealing (Cash Transaction) Fee of up to 3.00% on subscriptions and up 3.00% on redemptions.
- ◆ A conversion charge may be payable.
- ◆ The ongoing charges figure shown is an estimate due to a material change in the fee structure. The UCITS’ annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the “Fees and Expenses” section of the Prospectus and the Fund Supplement.

- ◆ Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- ◆ Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- ◆ The past performance of this share class is calculated in CHF.
- ◆ The investment benchmark for the Fund is the FTSE EPRA NAREIT Developed Net.
- ◆ The Fund was launched on 20 June 2011.
