## HSBC UCITS COMMON CONTRACTUAL FUND - ISLAMIC GLOBAL EQUITY INDEX FUND

a sub-fund of HSBC UCITS Common Contractual Fund, (the "UCITS");  
 managed by Carne Global Fund Managers (Ireland) Limited

Class:A2CGBP  
 ISIN:IE000G1X4XT2

### Objectives and Investment Policy

#### Investment Objective:

The Fund aims to achieve capital growth over the long term.

#### Investment Policy:

The Fund aims to track as closely as possible the performance of the S&P Global 1200 Shariah Select Index (the Index). The Fund will achieve its investment objective through investing in a diversified portfolio of shares which are Index constituents.

The Index measures the performance of the S&P Global 1200 Shariah Index (the Parent Index) constituents that are domiciled and listed in countries that have a total index weight greater than or equal to 0.20% of the total index weight of the Parent Index. The Parent Index comprises all Shariah-compliant constituents of the S&P Global 1200 Index. The S&P Global 1200 Index captures approximately 70% of global market values (also known as market capitalisations) and is a composite of 7 headline indices: the S&P 500<sup>®</sup> Index (US), the S&P Europe 350<sup>®</sup> Index, the S&P TOPIX 150 Index (Japan), the S&P/TSX 60 Index (Canada), the S&P/ASX All Australian 50 Index, the S&P Asia 50 Index and the S&P Latin America 40 Index.

The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index. There may be circumstances when it is not possible for the Fund to invest in all constituents of the Index. If the Fund cannot invest directly in the companies that constitute the Index, it may gain exposure by using other investments such as Shariah compliant ADRs and GDRs. The Fund will only invest in shares of companies that meet Shariah compliance principles as interpreted or approved by the Shariah Committee.

The Index is rebalanced quarterly in March, June, September, and December, with an annual review each September. Eligible countries are

determined by index weight thresholds and only shares domiciled and listed in these countries may be included, subject to specific criteria for new country's inclusion. The Index undergoes a monthly Shariah compliance review where non-compliant shares are dropped from the Index.

To track the performance of the Index, the Fund may invest up to 20% of its asset value in shares issued by the same body and up to 35% for a single issuer in the exceptional market conditions.

The Fund may invest up to 10% of its assets in other funds and may hold cash and Shariah compliant cash equivalents. The Fund will not invest in funds that are themselves tax transparent vehicles, such as common contractual funds in Ireland or their equivalent in other jurisdictions. The Fund may use Shariah compliant foreign exchange forwards for hedging purposes.

### Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

#### Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

#### Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
