

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC Sterling ESG Liquidity Fund

a sub-fund of HSBC Global Liquidity Funds Plc, (the "UCITS");
 managed by HSBC Investment Funds (Luxembourg) S.A.

Class:J
 ISIN:IE000GM4JNT2

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide security of capital, daily liquidity and an investment return that is similar to Sterling denominated money markets interest rates while considering select environmental, social and governance (ESG) criteria. The Fund is classified under Article 8 of SFDR.

Investment Policy:

The Fund invests in a diversified portfolio of short-term securities, instruments, and obligations. These instruments are of high quality at the time of purchase and are eligible for investment under the Money Market Fund Regulation with an additional focus on the performance of the underlying issuers on a range of ESG metrics.

The Fund invests in short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by companies, governments and government-related entities traded on a Recognised Market.

The weighted average portfolio maturity of the Fund will not exceed 60 days and the weighted average portfolio life of the Fund will not exceed 120 days.

The Fund may only invest in securities that are denominated in (or hedged back into) Pound Sterling and may also invest in reverse repurchase agreements. The Fund's investments will, at the time of purchase, typically have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency.

The Fund can invest in a range of short-term securities, instruments, and obligations such as certificates of deposit; medium term, variable and floating rate notes; commercial paper; bankers acceptances; treasury bills and Eurobonds; and asset backed securities.

Although the Fund does not have a specific sustainable investment objective, the Investment Manager shall promote environmental and social characteristics, and invest in issuers following good governance practices.

The Investment Manager shall seek to identify issuers that are considered to be better at addressing ESG risks than other issuers in the investable universe. The Investment Manager will assign an ESG score to each approved issuer in the Fund's investable universe. A combination of screens such as relative ESG scores, adherence to the United Nations Global Compact and sector specific screens will be used to screen the Fund's theoretical investable universe of issuers to create the 'best in class' investable universe of issuers. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies.

Please refer to the prospectus for more details on ESG scores, issuer screening and engagement, and excluded activities.

The Fund may also invest in financial derivative instruments and may use them for hedging purposes.

- ◆ The reference currency of the Fund is GBP. The reference currency of this share class is GBP.
- ◆ The Fund is actively managed and does not track a benchmark. The reference benchmark for the Fund is SONIA (Sterling Overnight Index Average).
- ◆ Income is reinvested.
- ◆ You may sell your investment on most working days.
- ◆ Recommendation: this Fund may be appropriate for investors who plan to invest over a short term.
- ◆ The Fund is classified as a Low Volatility NAV Money Market Fund under the Money Market Fund Regulations. For further details on how these funds operate, please refer to the Prospectus.
- ◆ This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 1 because its price or simulated data has shown very low fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Money Market Fund Risk** The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.15%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Past Performance

- ◆ The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- ◆ The Fund may charge a Liquidity Fee of up to 3.00% of the Net Asset Value per Share at the discretion of the Directors, if other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all remaining shareholders.
- ◆ A conversion charge may be payable.
- ◆ The ongoing charges figure shown here is an estimate of the charges as the share class has not been priced for a full financial year. The UCITS’ annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the “Charges and Expenses” section of the Fund’s Prospectus.

- ◆ Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- ◆ Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- ◆ The past performance of this share class is calculated in GBP.
- ◆ The reference benchmark for the Fund, for comparison purposes only, is the SONIA (Sterling Overnight Index Average).
- ◆ The Fund was launched on 12 October 2021.
- ◆ Insufficient data is available to provide past performance figures.
