

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852).

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective:_%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective:_%</p>	<p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0.00% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>
--	--

What environmental and/or social characteristics are promoted by this financial product?

In tracking the performance of the Bloomberg MSCI Global Treasury ESG Weighted Bond (USD unhedged) Index (the "Index"), the Sub-Fund promotes the following environmental and/or social characteristics: - Management of long term environmental, social and governance related issues that could impact the long-term sustainability of economies as measured by MSCI Government ESG scores. MSCI Government ESG scores provide an opinion of sovereign and sub-sovereign entities' exposure to and management of ESG risks. The ESG risk factors considered by MSCI ESG Government scores range across environmental, social and governance pillars and are determined by MSCI. The ESG risks considered relate to natural resources, climate change and natural hazards, human capital, economic environment, financial governance and political governance. The Sub-Fund will target this by seeking to improve the MSCI Government ESG score against that of the Bloomberg Global Aggregate Treasury Index (the "Parent Index"). The Sub-Fund seeks to achieve the promotion of these characteristics by tracking the performance of the Index which uses MSCI Government ESG scores to tilt country allocations above or below their market value weights in the Parent Index in order to reduce exposure to countries with high exposure to and/or low management of ESG risks and to improve the exposure to countries with favourable MSCI Government ESG scores. The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**
The below sustainability indicator is used to measure the attainment of the environmental and social characteristics promoted by Sub-Fund, specifically measuring: - MSCI Government ESG score of the Sub-Fund, relative to the Parent Index, whereby the MSCI Government ESG score of the Sub-Fund is expected to be higher than that of the Parent Index
- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**
The Sub-Fund does not commit to making sustainable investments.
- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**
Not applicable.
How have the indicators for adverse impacts on sustainability factors been taken into account?
Not applicable.
How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

- ☑ Yes, the Index is constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each country provides a MSCI Government ESG scores and rates countries on a seven-point scale from ‘AAA’ (best) to ‘CCC’ (worst). Ratings are derived from 0-10 scores on underlying factors in three pillars: Environmental, Social, and Governance. The model contains scores on all these sub-factors to provide granular insight on a country’s performance on the issues. The risk factors include in the assessment of a countries MSCI Government ESG score are: 1. Environmental risks; Natural resources & Environmental externalities and vulnerability. These risk factors cover how countries effectively manage water use, land use and mineral resources (PAI 5) and impact on environmental externalities (PAI 7,8), it also includes energy resource management and conservation (PAI 1,2) 2. Social Risk; Human Capital and Economic environment. 3. Governance Risk; Financial governance & political governance. The risk factors include politic rights and civil liberties, corruption control and stability and peace

(PAI 10) Included are a set of screening factors for each country which shows the profile of a country's status with respect to various values- and mission-based issues and controversies, such as child or forced labour and armed conflicts, and whether the country is a party to international conventions related to endangered species, biological diversity, chemical and biological weapons (PAI 7, 14). The methodology uses the MSCI Government ESG score (as calculated by MSCI) to apply tilt factors to increase weight to those countries with more robust ESG characteristics. How PAI indicators were considered will be included in the Sub-Fund's year-end report and accounts. Further information is available on request. The performance of these PAIs will be included in the Sub-Fund's year-end report and accounts. Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

No

What investment strategy does this financial product follow?

The Sub-Fund is passively managed and will aim to track the performance of the Index while minimising as far as possible the tracking error between the Sub-Fund's performance and that of the Index and promoting environmental and social characteristics within the meaning of Article 8 of SFDR. The Sub-Fund will use optimisation techniques which take account of tracking error and trading costs when constructing a portfolio. The Index measures the performance of investment grade, fixed-rate, taxable securities issued by government and government-related issuers using MSCI Government ESG scores to tilt country allocations above or below their market value weights in the Bloomberg Global Aggregate Treasury Index. The Index achieves this in the following ways: 1. On a monthly basis, the Index uses fixed multipliers to adjust the weight of each eligible security in the Index above or below their market value weights in the Parent Index. Security weights are then normalized using these adjusted market values.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows: The weight of each index eligible security is adjusted by a fixed multiplier which is determined by the market value weight the issuing country holds within the Parent Index, along with its MSCI Government ESG Score (0-10) (based on data from MSCI ESG Research). The MSCI Government ESG Scores are determined based on an assessment of a country's exposure to and management of ESG risks. Efficiency of resource utilisation, performance on socio-economic factors, financial management, corruption control, political stability and other factors define the parameters for measuring a country's ESG risk management. Further information on the Index methodology is available from the Index Provider's website detailed in the "Where can the methodology used for the calculation of the designated index be found?" section of this document.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-Fund does not have a committed minimum rate to reduce the scope of investments

- **What is the policy to assess good governance practices of the investee companies?**

Not applicable as the Sub-Fund invests in sovereign debt securities and not companies.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

In seeking to achieve its investment objective, the Sub-Fund will aim to invest in the constituents of the Index in generally the same proportions in which they are included in the Index. As such, it is expected that at least 80% of the Sub-Fund's assets will be invested in either securities within the Index or in securities that meet the ESG criteria of the Index (“#1 Aligned with E/S characteristics”). The Sub-Fund may invest up to 20% of its assets in other investments (“#2 Other”). At each index rebalance, the portfolio of the Sub-Fund will be rebalanced in line with the Index so that at least 80% of the Sub-Fund's assets will be aligned with the ESG criteria of the Index (this includes 0% of the Sub-Fund's assets that are qualified as #1A sustainable investments).

Taxonomy-aligned activities are expressed as a share of:

- turnover

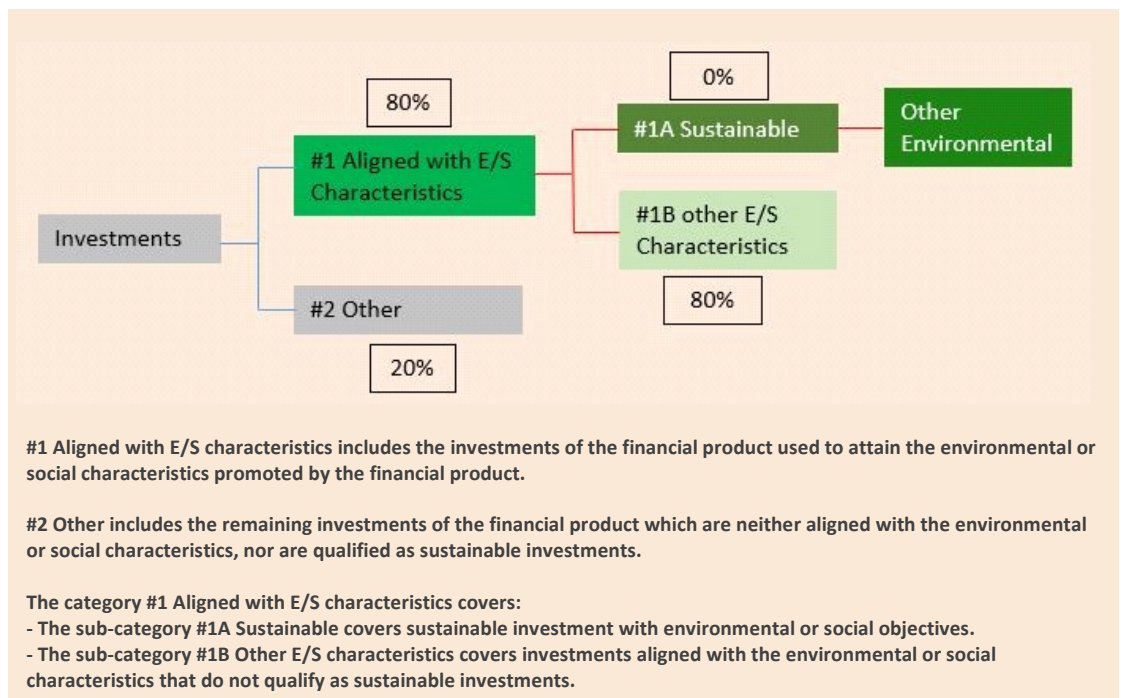

reflecting the share of revenue from green activities of investee companies

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure

(OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Sub-Fund will not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not intend to commit to a minimum share of sustainable investments with an environmental objective that are aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ?¹**

- yes in fossil gas In nuclear energy
- No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective –see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund does not have a specific minimum share of transitioning and enabling activities.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

 **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

 **What is the minimum share of socially sustainable investments?**

The Sub-Fund does not commit to a minimum share of socially sustainable investments.

 **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may be used for hedging and efficient portfolio management in respect of which there are no minimum environmental and/or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes.

The investment objective of the Sub-Fund is to track the performance of the Bloomberg MSCI Global Treasury ESG Weighted Bond Index (total return hedged to USD).

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

The weight of each index eligible security is adjusted by a fixed multiplier which is determined by the market value weight the issuing country holds within the Parent Index along with its MSCI Government ESG score (0-10) (based on data from MSCI ESG Research). The MSCI Government ESG scores are determined based on an assessment of a country's exposure to and management of ESG risks. Efficiency of resource utilisation, performance on socio-economic factors, financial management, corruption control, political stability and other factors define the parameters for measuring a country's ESG risk management. The Index will be rebalanced on a monthly basis in order to account for the eligibility criteria.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The investment objective of the Sub-Fund is to track the performance of the Bloomberg MSCI Global Treasury ESG Weighted Bond Index (total return hedged to USD), while minimising as far as possible the Tracking Error between the Sub-Fund's performance and that of the Index. The Index will be rebalanced on a monthly basis in order to account for the eligibility criteria.

- **How does the designated index differ from a relevant broad market index?**

The Index measures the performance of investment grade, fixed-rate, taxable securities issued by government and government-related issuers using MSCI Government ESG scores to tilt country allocations above or below their market value weights in the Bloomberg Global Aggregate Treasury Index. On a monthly basis, the Index uses fixed multipliers to adjust the weight of each eligible security in the Index above or below their market value weights in the Parent Index. Security weights are then normalized using these adjusted market values.

- **Where can the methodology used for the calculation of the designated index be found?**

www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/#/ucits. The Index methodology may be amended from time to time by the Index provider. Information on the Index methodology is available on the website above.

Where can I find more product specific information online?

More product specific information on this and all other HSBC funds can be found on the website. Go to: www.assetmanagement.hsbc.com and select your type of investor and country/location. Please select 'Funds' from the main navigation page, where you can use the search or filter functions to find your particular fund.
