

HSBC Global Funds ICAV

Multi Factor US Equity Fund

Marketing communication | Monthly report 31 July 2025 | Share class ZC

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long-term capital growth.

Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies incorporated in the US or those that earn the majority of their revenue from the US.

The Investment Manager identifies stocks which may or may not comprise the S&P 500 Index (USD Net Total Return), and uses a proprietary quantitative investment process to create a portfolio which focuses on risk premia offered by exposure to factors such as value, quality, momentum, low risk and size.

The investment approach is subject to ongoing research regarding the above factors. A portfolio is then created which maximises the exposure to the highest ranked equity securities based on the above factors while minimising the portfolio's risk.

The Fund may hold cash and money market instruments, invest up to 10% in other funds and up to 10% in total return swaps.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Share class details

Key metrics

NAV per share	USD 13.46
Performance 1 month	2.79%

Fund facts

UCITS V compliant	Yes

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
