# HSBC FTSE EPRA NAREIT DEVELOPED ISLAMIC UCITS ETF

Marketing communication | Monthly report 31 October 2025 | HIND LN | USD (Acc)

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

# Investment objective

The Fund aims to track as closely as possible the returns of the FTSE EPRA Nareit IdealRatings Developed Islamic Index (the Index).

# Investment strategy

The Index is a subset of the FTSE EPRA Nareit Developed Index (Parent Index), and includes REITs and Real Estate Holding and Developing companies in developed markets, that comply with Shariah investment principles, as defined by the Index Provider.

The Index is constructed by applying Business Activities and Financial Screening according to the FTSE IdealRatings Islamic Indexes Screening Guide to the Parent Index. By applying Business Activities Screening, for example, investment will not be permitted in companies deriving more than 5% of their total revenue, or in REITs that generate income, through tenants operating in any of the specified business activities; such as, defense or weapons, alcohol or pork-related products.

The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index.

The Shariah committee monitors the Fund periodically and issues an annual Shariah certificate on the Fund's compliance with Shariah principles.

The Fund may invest up to 35% of its assets in securities from a single issuer during exceptional market conditions

See the Prospectus for a full description of the investment objectives and derivative usage."

# Main risks

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").

### Risk disclosures

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- · Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
