

HSBC Global Liquidity Funds Plc

HSBC Sterling Liquidity Fund

Marketing communication | Monthly report 30 November 2025 | Share class B

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide security of capital, daily liquidity and a return that is similar to Sterling money markets.

Investment strategy

The Fund is actively managed. The Fund will invest in a diversified portfolio of short-term securities, instruments and obligations. These instruments will be short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by companies, governments and government-related entities and either listed or traded on a Recognised Market. The Fund's investments will, at the time of purchase, have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency, such as Standard & Poor's or Moody's. The Fund can invest in a range of short-term securities, instruments and obligations such as: certificates of deposit; medium term, variable and floating rate notes; commercial paper; bankers acceptances; government bonds, corporate bonds, treasury bills and Eurobonds; asset backed securities and reverse repurchase agreements. The Fund's liquidity is daily – meaning investors can redeem their investment on any business day. The Fund is classified as a Low Volatility NAV Money Market Fund under the European Union Money Market Fund Regulations. The Fund's primary currency exposure is to Pound Sterling. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.

²The "AAAm", "Aaa-mf" and "AAAmf" money market fund ratings are historical and reflect the superior quality of the Fund's investments, sound liquidity management, and strong operations and trading support. Periodic reviews are conducted to ensure a secure operations environment. The ratings do not eliminate the risks associated with investing in the Fund.

Past performance does not predict future returns. The figures are calculated in the share class base currency, dividend reinvested, net of fees. Returns of 1 year or less are annualised on a simple basis and for periods greater than 1 year returns are annualised on a compound basis. All yields are annualised using 365 days in accordance with the Institutional Money Market Funds Association. This is a marketing communication. Please refer to the prospectus and to the KID before making any final investment decisions. For definition of terms, please refer to the Glossary QR code and Prospectus.

Since Inception to 16th March 2020 the Benchmark was 1 Week GBP LIBID. From 16th March 2020 the benchmark is Sterling Overnight Index Average (SONIA).

Risk disclosures

- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Important information

The material contained herein is for marketing purposes and is for your information only.
