HSBC Global Liquidity Funds Plc

HSBC Euro Liquidity Fund

Marketing communication | Monthly report 30 September 2026 | Share class GROSS

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide security of capital, daily liquidity and a return that is similar to Euro money markets. The Fund is classified as an Article 8 Fund under SFDR.

Investment strategy

The Fund is actively managed.
The Fund will invest in a diversified portfolio of short-term securities, instruments and obligations. These instruments will be short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by companies, governments and government-related entities and either listed or traded on a Recognised Market.
The Fund's investments will typically have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency.
The Fund's liquidity is daily – meaning investors can redeem their investment on any business day.
The Fund is classified as a Low Volatility NAV Money Market Fund under the European Union Money Market Fund Regulations.
The Fund's only currency exposure is to Euro.
Although the Fund does not have a specific sustainable investment objective, the Investment Manager shall promote among other characteristics, environmental and social characteristics and invest in issuers following good governance practices.
See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund. The Fund is not a cash deposit account. While Money Market Funds aim to preserve capital, they are not guaranteed and are not covered by retail deposit schemes.

Risk disclosures

- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
