# HSBC Global Funds ICAV - Global Equity Index Fund

a sub-fund of HSBC Global Funds ICAV, (the "UCITS");  
managed by HSBC Investment Funds (Luxembourg) S.A.

Class:HCHKD  
ISIN:IE00BJLML261

## Objectives and Investment Policy

- The investment objective is to achieve capital growth on your investment over time.
- The investment policy is to track the performance of the MSCI World Net Total Return Index (the "Index").
- The Index is made up of the largest companies of the world's developed equity markets, including Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Israel, The Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, Hong Kong, Japan, Singapore, Australia, New Zealand, Canada and USA.
- The Fund may invest in equity securities which are Index constituents. The Fund is passively managed and utilises optimisation techniques which take into account tracking error and trading costs when constructing the portfolio. This means that the Fund may not hold each underlying Index constituent or may not hold them close to their Index weights. The Fund may hold securities which are not Index constituents.
- The Fund may gain exposure to the shares in the index using other investments such as derivatives or other funds.
- The Fund may invest in up to 10% of its assets in other funds (including other funds of HSBC).
- The Fund may invest up to 10% of its assets in total return swaps. However, this exposure is not expected to exceed 5%.
- The Fund may use derivatives for hedging and efficient portfolio management with a level of risk that is consistent with the overall risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.
- The reference currency of the Fund is USD. The reference currency of this share class is HKD.
- The investment management process will result in periods when the Fund's performance may be close to that of the reference benchmark, as well as periods when it is not.
- Income is reinvested.
- You may sell your investment on most working days.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

## Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

### Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

### Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

## Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charge	0.40%
----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge of up to 1.00% of the Net Asset Value of the Shares which are being converted may be payable to the relevant distributor.
- The ongoing charges figure is based on last year's expenses for the year ending 31/12/2020. Charges may vary from year to year.

Further information on Charges can be found in the "Charges and Expenses" section of the Fund's Prospectus.

## Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in HKD.
- The investment benchmark for the Fund is the MSCI World Net Total Return Index.
- The Fund was launched on 24 April 2019.
