

## HSBC ETFs PLC

# HSBC EUROPE EX UK SCREENED EQUITY UCITS ETF

Marketing communication | Monthly report 31 May 2025 | HSXU LN | EUR (Dist)

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

## Investment objective

The Fund aims to track as closely as possible the returns of the FTSE Developed Europe ex UK ESG Low Carbon Select Index (the "Index"). The Fund will invest in, or gain exposure to shares of companies which make up the Index. The Fund qualifies under Article 8 of SFDR.

## Investment strategy

The Index is a subset of the FTSE Developed Europe ex UK Index (the "Parent Index") and made up of companies in the developed countries in Europe ex UK, as determined by the Index provider.

The Index seeks to achieve a reduction in carbon emissions and fossil fuel reserves exposure, and an improvement of the FTSE Russell ESG rating against that of the Parent Index. It excludes shares of companies with exposure to: tobacco, thermal coal extraction, electricity generation, gambling, adult entertainment and controversial weapons. The Index also applies the United Nations Global Compact exclusionary criteria.

The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index.

The Fund may invest up to 35% in securities from a single issuer during exceptional market conditions, up to 10% in total return swaps and contracts for difference and up to 10% in other funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

## Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

The ESG Ratings are comprised of an overall Rating that breaks down into underlying Pillar and Thematic Exposures and Scores. A higher number indicates a more favourable ESG profile in the view of FTSE.

## Risk disclosures

- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
