

## HSBC Global Investment Funds

# EUROPE VALUE

Monthly report 30 June 2024 | Share class ZC

### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of European shares, while promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR. The Fund aims to have a higher ESG score than its reference benchmark.

### Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in any developed European country.

The Fund includes the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process to help assess risks and potential returns.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund may invest up to 10% in Real Estate Investment Trusts, may invest in bank deposits, money market instruments for treasury purposes and may also invest up to 10% of its net assets in other funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.

### Share class details

#### Key metrics

NAV per share	<b>EUR 13.29</b>
Performance 1 month	<b>-2.83%</b>
Volatility 3 years	<b>14.67%</b>

#### Fund facts

UCITS V compliant	<b>Yes</b>

Risk disclosures

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that the reference benchmark will not be used as a universe from which to select securities. The deviation of the Fund’s performance and underlying investments’ weightings relative to the benchmark are monitored, but not constrained, to a defined range.
