

# **HSBC Global Investment Funds**

# BRAZIL EQUITY

Marketing communication | Monthly report 31 July 2025 | Share class ID

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

## 🕉 Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Brazilian shares.

# Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in Brazil.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund may invest up to 10% in Real Estate Investment Trusts, may invest in bank deposits and money market instruments for treasury purposes, and may also invest up to 10% of its net assets in other funds, including HSBC funds.

The Fund may invest up to 10% in a combination of participation notes and convertible securities. See the Prospectus for a full description of the investment objectives and derivative usage.

# 🚺 Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

## **Risk disclosures**

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
