

HSBC Global Investment Funds

ASIAN CURRENCIES BOND

Monthly report 31 March 2024 | Share class IC

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Asian bonds.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 70% of its assets in investment grade bonds, non-investment grade bonds and unrated bonds denominated in Asian currencies, issued by governments, government-related entities, supranational entities, and companies based in or carry out the larger part of their business in Asia. The Fund may invest up to 30% of its assets in onshore Chinese bonds which are issued within the People's Republic of China (PRC) and traded on the China Interbank Bond Market. The Fund may invest up to 10% of its assets in bonds with a rating below investment grade (BB+ or below, as assigned by a local credit rating agency in PRC), or which are unrated. The Fund may invest up to 10% in convertible bonds. The Fund may also invest up to 10% of its assets in other funds, including HSBC funds. The Fund's primary currency exposure is to Asian currencies. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.

Share class details

Key metrics

NAV per share	USD 8.93
Performance 1 month	-0.25%
Yield to maturity	3.87%

Fund facts

UCITS V compliant	Yes
UK reporting fund status (UKRS)	Yes
ISA eligible	Yes

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's underlying investments' weightings relative to the benchmark are monitored, but not constrained, to a defined range.
