

## HSBC Global Investment Funds

# EUROLAND GROWTH

Marketing communication | Monthly report 31 July 2025 | Share class M1C

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Eurozone shares, while promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR. The Fund aims to have a higher ESG score than its reference benchmark.

### Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in a European Monetary Union member country. The Fund typically focuses on profitable companies with higher-than-average reinvestment rates that maintains or increases their current level of growth. The Fund includes the identification and analysis of a company's environmental and social factors and corporate governance practices as an integral part of the investment decision making process. Companies considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund may invest up to 10% in Real Estate Investment Trusts, up to 10% in other funds, and may invest in bank deposits and money market instruments. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

## Risk disclosures

- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

## Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that the reference benchmark will not be used as a universe from which to select securities. The deviation of the Fund's performance and underlying investments' weightings relative to the benchmark are monitored, but not constrained, to a defined range.
