

HSBC Global Investment Funds

TURKEY EQUITY

Marketing communication | Monthly report 31 July 2025 | Share class AD

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Türkiye shares.

Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will primarily invest in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in Türkiye. Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund may invest up to 10% of its assets in other funds, including HSBC funds and may invest in bank deposits and money market instruments for treasury purposes.

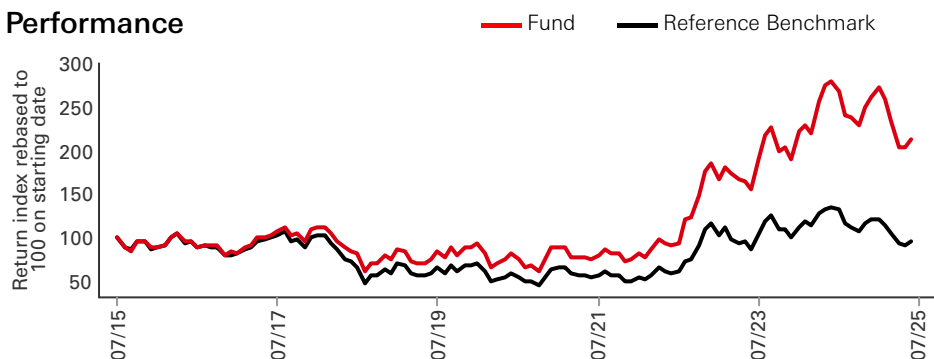

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Index disclaimer

Borsa Istanbul does not benchmark in accordance with this Agreement, shall state that Borsa Istanbul does not sponsor, guarantee or provide surety for the use of the Index/Indices by the Licensee, nor does it guarantee the sequence, accuracy and/or the entirety of the data used in calculating the Index. nor can it be held responsible for any loss or damage to the Licensee or to third parties arising from any faults, failures, delays, omissions, inaccuracy in data transmission or stopping of data dissemination due to any reasons, for any errors, omissions, delays and/or negligence in the calculation and/or dissemination of the Indices, or for the use of the Indices as benchmark for collective investment instruments.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The reference benchmark has a high level of concentration. This means that a small number of securities make up a significant proportion of the benchmark.
