

HSBC Global Investment Funds

RMB FIXED INCOME

Monthly report 28 February 2023 | Share class XD

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of China Renminbi (RMB) bonds.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will primarily invest its assets in offshore (i.e. issued outside of the People's Republic of China, PRC) and onshore (i.e. issued within the PRC and traded on the China Interbank Bond Market) RMB denominated bonds. The Fund may invest in investment grade bonds, non-investment grade bonds and unrated bonds issued by government, government-related entities, supranational entities and companies. The Fund may invest up to 100% in onshore Chinese bonds and up to 10% in bonds which are rated below investment grade (BB+ or below, as assigned by a local credit rating agency in PRC), or which are unrated. The Fund may also invest up to 10% in cash and money market instruments and up to 10% in other funds. The Fund may invest up to 10% in convertible bonds and up to 10% in contingent convertible bonds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.

Share class details

Key metrics

NAV per share	USD 12.52
Performance 1 month	-2.83%
Yield to maturity	4.01%

Fund facts

UCITS V compliant	Yes
ISA eligible	No

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Investor Information Document (KID) and/or the Prospectus or Offering Memorandum.

Important information
