

HSBC Global Investment Funds - Mexico Equity

Share Class IC

As at 31 December 2020

Investment Aim

The Fund invests for long-term total return (meaning capital growth and income) by investing in a diversified portfolio of shares (or securities that are similar to shares) of Mexican companies. The companies issuing these shares will have a registered office and official stock-market listing in Mexico, or carry out most of their business there. There aren't restrictions on the market values of the companies held in the Fund. In addition, the Fund may invest up to 10% of its assets into other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. This fund invests predominantly in one geographic area; therefore any decline in the economy of this area may affect the prices and value of the underlying assets. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. For a full list of risks, please refer to the Prospectus and KIID.
