

HSBC Global Investment Funds

GLOBAL EQUITY VOLATILITY FOCUSED

Marketing communication | Monthly report 31 May 2025 | Share class ACOAUD

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of shares worldwide.

Investment strategy

The Fund is actively managed.

The Fund will invest at least 90% in shares of companies of any size that are based in both developed markets and emerging markets.

The Fund seeks a portfolio volatility which is lower than that of the MSCI All Country World Index. The Fund uses a quantitative multi-factor investment process to identify stocks from a universe of investable shares, and ranks them from the least attractive to most attractive based upon certain factors, such as value, quality, momentum, low risk and size.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies.

The Fund can invest up to 20% in China A and China B-shares, and may invest in bank deposits and money market instruments for treasury purposes.

The Fund may invest up to 10% in a combination of participation notes and convertible securities, up to 10% each in securities issued or guaranteed by single sovereign issuers with a non-investment grade rating, up to 10% in Real Estate Investment Trusts and up to 10% in other funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Share class details

Key metrics

NAV per share	AUD 17.68
Performance 1 month	4.05%

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
