

HSBC Global Investment Funds

GLOBAL BOND TOTAL RETURN

Marketing communication | Monthly report 31 March 2025 | Share class XC

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of global bonds, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund aims to have a higher ESG score than its reference benchmark.

Investment strategy

The Fund is actively managed and is not constrained by a benchmark.

The Fund employs a Total Return strategy which has a flexible allocation across the global bond universe and currency markets, over an investment cycle, to achieve risk-adjusted returns above those of the investment universe.

The Fund will primarily invest in investment grade bonds and non-investment grade bonds issued by governments, government-related entities, supranational entities and companies that are based in developed or emerging markets.

The Fund includes the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process.

The Fund may invest up to 10% in onshore Chinese bonds, up to 10% in non-investment grade securities; up to 30% in asset-backed securities and mortgage-backed securities; up to 10% in contingent convertible securities; up to 49% in cash and money market instruments; and up to 10% in other funds.

The Fund's primary currency exposure is to USD.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.

Share class details

Key metrics	
NAV per share	USD 12.25
Performance 1 month	-0.92%
Yield to maturity	6.18%
Fund facts	
UCITS V compliant	Yes
UK reporting fund status (UKRS)	Yes
ISA eligible	Yes

MSCI ESG Score	ESG score	E	S	G
Fund	7.1	7.2	5.4	6.1

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

For more information, see MSCI ESG Ratings Methodology @ <https://www.msci.com/esg-and-climate-methodologies>

Past performance does not predict future returns. The figures are calculated in the share class base currency, dividend reinvested, net of fees.

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
