

HSBC Global Investment Funds

ASIA EX JAPAN EQUITY SMALLER COMPANIES

Monthly report 30 June 2022 | Share class XCEUR

Investment objective

The Fund aims to provide long term capital growth by investing in a portfolio of Asian (excluding Japan) shares.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 90% of its assets in shares of companies that are based in, or carry out the larger part of their business activities in Asia (excluding Japan), including both developed markets and emerging markets. The Fund will not invest in shares issued by companies with exposure to specific Excluded Activities, including but not limited to, weapons, thermal coal extraction, coal-fired power generation and tobacco. The Fund may invest up to 70% in smaller sized companies. These companies are defined as being in the bottom 25% by market value in the Asia ex Japan universe. The Fund may invest up to 50% in China A and China B-shares. For China A-shares, up to 50% through the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect, and up to 30% in CAAPs. The Fund may invest up to 10% in other funds and will not invest more than 15% in Real Estate Investment Trusts. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Investor Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. Any deviations with respect to the benchmark are monitored within a comprehensive risk framework, which includes monitoring at sector and country level. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
