The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC GLOBAL INVESTMENT FUNDS - MULTI-STRATEGY TARGET RETURN

a sub-fund of HSBC Global Investment Funds, (the "UCITS");
 managed by HSBC Investment Funds (Luxembourg) S.A.

Class:ID
 ISIN:LU1574280555

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide capital growth and income by investing in a range of assets classes, including bonds, shares, money-market securities, currency, cash, and other funds.

Investment Policy:

The Fund targets annualised returns of ESTR plus 4% (gross of annual ongoing charges) over a rolling three-year period. The Fund aims to do this with annualised volatility (a rate that measures the risk of a Fund by estimating the range to which the price of your shares may increase or decrease) of 6-8% over a rolling three-year period. You should be aware that your capital is at risk and there is no guarantee of stable growth over any time period.

The Fund employs complementary strategies which may invest across a diversified range of asset classes (directly and indirectly through derivatives and funds) from across the world. These include shares and similar securities, bonds and similar securities, currency, cash, commodities and other UCITS eligible assets. The strategies may be long only (where the Fund benefits from increases in an assets value) or may be long and short (where the Fund benefits from decreases in an assets value). Please refer to the Prospectus for more details on strategies implemented.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. Please refer to the Prospectus for further details on excluded activities.

The Fund gains exposure to investment grade, non-investment grade and unrated bonds and similar securities issued or guaranteed by governments, government-related, supranational entities, and companies.

The Fund may invest up to 50% in shares of companies of any size, up to 100% in high and lower quality bonds and unrated bonds issued by governments, government-related entities, supranational entities, or companies, up to 20% in commodities, up to

100% in cash and money market instruments and up to 10% into other eligible assets such as asset backed securities and mortgage-backed securities.

The Fund may invest up to 10% of its assets in securities issued by any single sovereign issuer with a non-investment grade rating, up to 50% in other funds and may invest in bank deposits and money market instruments for treasury purposes.

The Fund may invest up to 10% of its assets in contingent convertible securities.

However, this is not expected to exceed 5%.

The Fund may have exposure up to 50% of its assets in non-EURO currencies, including emerging market currencies.

The Fund may invest up to 20% of its assets in Total Return Swaps.

The Fund may use derivatives for hedging, cash flow management and efficient portfolio management purposes, taking both long and short positions. Derivatives may also be embedded in other instruments used by the Fund.

- ◆ The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- ◆ The reference currency of the Fund is EUR. The reference currency of this share class is EUR.
- ◆ The Fund is actively managed and does not track a benchmark. The Fund has an internal or external target to a reference benchmark, Euro Short-Term Rate (ESTR).
- ◆ Income is distributed.
- ◆ You may sell your investment on most working days.
- ◆ Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 3 years.
- ◆ This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ◆ **Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.

- ◆ **Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds.
- ◆ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Interest Rate Risk** When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- ◆ **Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	3.10%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	1.05%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Past Performance

- ◆ The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- ◆ A conversion charge of up to 1.00% of the Net Asset Value of the Shares which are being converted may be payable to the relevant distributor.
- ◆ The ongoing charges figure shown is an estimate due to a material change in the fee structure. The UCITS' annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the “Charges and Expenses” section of the Fund’s Prospectus.

- ◆ Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- ◆ Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- ◆ The past performance of this share class is calculated in EUR.
- ◆ The reference benchmark for the Fund, for comparison purposes only, is the Euro Short-Term Rate (ESTR).
- ◆ Historically the benchmark has been: EUR 3 month EURIBOR from 21/03/2017 until 25/05/2021.
- ◆ The Fund was launched on 21 March 2017.
