

HSBC Global Investment Funds

GLOBAL EMERGING MARKETS MULTI-ASSET INCOME

Marketing communication | Monthly report 30 April 2026 | Share class AM2HKD

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide income and moderate capital growth through an active asset allocation in a diversified portfolio of bonds, shares, money market instruments and other instruments in Emerging Markets.

Investment strategy

The Fund is actively managed and is not constrained by a benchmark. At least 90% of the Fund's exposure is to assets that are based or issued in emerging markets. The Fund invests in investment grade, non-investment grade and unrated bonds issued or guaranteed by governments, government-related, supranational entities and companies based in emerging markets; and to shares issued by companies of any size. Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund may invest up to 20% in Chinese bonds, up to 10% in non-investment grade bonds issued by any single sovereign issuer, up to 90% in other funds, may invest in bank deposits and money market instruments, up to 10% in convertible bonds, up to 10% in contingent convertible securities and up to 30% in China A and China B-shares. The Fund's primary currency exposure is to emerging market currencies (exposure will not be less than 50%). See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless. The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Share class details

Key metrics

NAV per share	HKD 7.43
Performance 1 month	4.51%
Sharpe ratio 3 years	0.56

Fund facts

UCITS V compliant	Yes
UK reporting fund status (UKRS)	Yes
ISA eligible	Yes
Dividend treatment	Distributing
Distribution frequency	Monthly
Dividend ex-date	28 April 2026
Dividend yield ¹	5.87%
Last paid dividend	0.034569
Dealing frequency	Daily
Valuation time	17:00 Luxembourg
Share class base currency	HKD
Domicile	Luxembourg
Inception date	19 January 2018
Fund size	USD 39,050,643
Managers	Jaymeson Paul Kumm Nicholas McLoughlin Scott Davis

Fees and expenses

Minimum initial investment ²	USD 5,000
Ongoing charge figure ³	1.706%

Codes

ISIN	LU1711226867
Bloomberg ticker	HSGAM2H LX
SEDOL	BYVJ207

¹Dividend Yield: represents the ratio of distributed income over the last 12 months to the fund's current Net Asset Value.

²Please note that initial minimum subscription may vary across different distributors

³Ongoing Charges Figure is based on expenses over a year. The figure includes annual management charge but not the transaction costs. Such figures may vary from time to time.

Past performance does not predict future returns. The figures are calculated in the share class base currency, dividend reinvested, net of fees.

This is a marketing communication. Please refer to the prospectus and to the KID before making any final investment decisions.

Risk disclosures

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
