

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC GLOBAL INVESTMENT FUNDS - GLOBAL CORPORATE BOND

a sub-fund of HSBC Global Investment Funds, (the "UCITS");
managed by HSBC Investment Funds (Luxembourg) S.A.

Class:S1D
ISIN:LU1881499955

Objectives and Investment Policy

- The aim is to provide capital growth and income on your investment over time.
- The Fund will normally invest at least 90% of its assets in high quality fixed income securities (types of bonds), Asset Backed Securities and Mortgage Backed Securities or similar securities issued by companies. These companies may be in developed markets or emerging markets.
- The Fund may invest up to 20% of its assets in Asset Backed Securities (ABS), including Mortgaged Back Securities (MBS). ABS and MBS are types of debt securities the repayments from which come from loans or mortgages.
- At certain times the Fund may invest in lower quality securities. Normally the Fund's investment in lower quality securities will be limited to 10% of its assets.
- The Fund may invest up to 10% of its assets in Chinese onshore bonds through the China Interbank Bond Market (CIBM).
- The Fund may invest in securities denominated in developed market currencies or emerging market currencies.
- The Fund's primary currency exposure will be to US Dollars (USD). The Fund will normally hedge non-USD exposures into USD. At times, however, the Fund may have exposure to non-USD currencies, including emerging market currencies. Normally the Fund's exposure to non-USD currencies will be limited to 10% of its assets.
- The Fund may invest up to 10% of its assets in convertible securities
- The Fund may invest up to 10% of its assets in contingent convertible securities (CoCos). However, this exposure is not expected to exceed 5%.
- The Fund may invest up to 10% of its assets in other open-ended funds, including other funds of HSBC.
- The Fund may use derivatives to meet its investment objectives.
- The Fund may also use derivatives for hedging or efficient portfolio management purposes (such as to manage risks or costs or to generate additional capital or income).
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- The reference currency of the Fund is USD. The reference currency of this share class is USD.
- The Fund is actively managed and does not track a benchmark. The reference benchmark for the Fund is Bloomberg Global Aggregate Corporates AWS Hedged USD.
- The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
- The deviation of the Fund's performance and underlying investments' weightings relative to the benchmark are monitored, but not constrained, to a defined range.
- Income is distributed.
- You may sell your investment on most working days.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Callable Bond Risk** Any unexpected behaviour in interest rates could negatively impact the performance of callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).
- CoCo Bond Risk** Contingent convertible securities (CoCo bonds) are comparatively untested, their income payments may be cancelled or suspended, and they are more vulnerable to losses than equities and can be highly volatile.
- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	3.10%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.40%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge of up to 1.00% of the Net Asset Value of the Shares which are being converted may be payable to the relevant distributor.
- The ongoing charges figure shown here is an estimate of the charges as the share class has not been priced for a full financial year. The UCITS' annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the "Charges and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in USD.
- The reference benchmark for the Fund, for comparison purposes only, is the Bloomberg Global Aggregate Corporates AWS Hedged USD.
- The Fund was launched on 30 June 2014.
- Insufficient data is available to provide past performance figures.
