

HSBC Global Investment Funds

GLOBAL HIGH INCOME BOND

Marketing communication | Monthly report 31 May 2025 | Share class IM2

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide income by investing in a portfolio of higher yielding bonds, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund aims to have a higher ESG score than its benchmark.

Investment strategy

The Fund is actively managed.

The Fund may invest in investment grade rated and high yield bonds, Asian and Emerging Market debt instruments and may invest in bonds issued by governments, government related agencies and supranational bodies of developed and emerging markets.

The Fund's asset allocation is managed neutral positions: 25% USD Emerging Market bonds, 17.5% US investment grade corporate bonds, 17.5% US high yield bonds, 15% Euro denominated investment grade corporate bonds hedged to USD, 15% Euro denominated high yield bonds hedged USD, 10% Global Securitised.

The Fund includes the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process. Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies.

The Fund may invest up to 10% in onshore Chinese bonds, up to 10% in convertible bonds, up to 10% in contingent convertible securities and up to 20% in asset backed securities and mortgage-backed securities.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.

Reference benchmark	6.0	6.2	5.2	5.7

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI’s E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies’ scores are normalized by their industries. After any overrides are factored in, each company’s Final Industry-Adjusted Score corresponds to a rating.

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
