HSBC GLOBAL INVESTMENT FUNDS - GLOBAL CREDIT FLOATING RATE FIXED TERM BOND 2023 - 1

a sub-fund of HSBC Global Investment Funds, (the "UCITS");
 managed by HSBC Investment Funds (Luxembourg) S.A.

Class:PM3HRMB
 ISIN:LU1987800577

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide capital growth and income by investing in a portfolio of bonds for a limited term.

Investment Policy:

The Fund is intended to be in operation until 30 June 2023 (the "Term Date"). On the Term Date, the Fund will be liquidated, and shares of the Fund will be compulsorily redeemed at the prevailing valuation per share. The Term Date may be deferred for up to 3 months if the Board of Directors believes it is in the best interest of shareholders.

The Fund will seek to invest in bonds with a final maturity date close to the Term Date, aiming to hold them to maturity whilst actively monitoring and maintaining the portfolio.

As the term date approaches, the Fund's assets will increasingly comprise of cash and cash equivalents. Shareholders may receive a pro rata share of the liquidation proceeds during the Fund's final 12 months by way of quarterly compulsory redemptions of their shares at the prevailing net asset value per Share. Shareholders will be given advance notification of the estimated number of shares to be redeemed, the estimated share of the proceeds they are entitled to, as well as each of the quarterly compulsory redemption dates. The final compulsory redemption will occur on the Term Date.

The Fund will mainly invest in Investment Grade bonds and non-investment grade bonds issued by governments, government-related entities, supranational entities, and companies, based in both developed markets and emerging markets. The Fund will use derivatives to swap

its fixed coupon income into a floating rate, with a target of 85% of the Fund's income being based on floating rates and 15% on fixed rates. The Fund may invest up to 10% of its assets in other funds and may invest in bank deposits, money market instruments for treasury purposes.

The Fund may also invest in derivatives and may use them for hedging, investment purposes and efficient portfolio management. Derivatives will not be used extensively for investment purposes.

- ◆ The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- ◆ Currency hedging is carried out in respect of the share class. The aim is to protect against exchange rate fluctuations between the share class currency CNH and the base currency of the Fund USD.
- ◆ The reference benchmark, shown in the past performance section, does not take account of currency hedging. There may be a greater difference between the past performance of the share class and the reference benchmark than for other share classes in the Fund.
- ◆ The Fund is actively managed and does not track a benchmark. The Fund has an internal or external target to a reference benchmark, ICE LIBOR USD 3 Month.
- ◆ Income is distributed.
- ◆ You may sell your investment on most working days.
- ◆ Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 3 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Callable Bond Risk** Any unexpected behaviour in interest rates could negatively impact the performance of callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).
- ◆ **CoCo Bond Risk** Contingent convertible securities (CoCo bonds) are comparatively untested, their income payments may be cancelled or suspended, and they are more vulnerable to losses than equities and can be highly volatile.

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ◆ **Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- ◆ **Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds.
- ◆ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Interest Rate Risk** When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	3.10%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.42%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- ◆ The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- ◆ A conversion charge of up to 1.00% of the Net Asset Value of the Shares which are being converted may be payable to the relevant distributor.
- ◆ The ongoing charges figure is based on last year's expenses for the year ending 31/03/2023. Charges may vary from year to year.

Further information on Charges can be found in the "Charges and Expenses" section of the Fund's Prospectus.

Past Performance

- ◆ Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- ◆ Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- ◆ The past performance of this share class is calculated in CNH.
- ◆ The reference benchmark for the Fund, for comparison purposes only, is the ICE LIBOR USD 3 Month.
- ◆ The Fund was launched on 24 June 2019.
