

HSBC Global Investment Funds

GLOBAL CORPORATE BOND

Monthly report 30 November 2023 | Share class ZBFIX8.5HJPY

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of corporate bonds, while promoting environmental, social and governance (ESG) Characteristics. The Fund also aims to achieve a higher ESG rating than the weighted average of the constituents of its reference benchmark. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 70% of its assets in a combination of investment grade bonds issued by companies in both developed markets and emerging markets and may invest up to 20% in asset-backed securities and mortgage-backed securities. The Fund will not invest in bonds issued by companies with involvement in specific excluded activities, such as, companies involved in the production of controversial weapons and tobacco; companies with more than 10% revenue generated from thermal coal extraction and companies with more than 10% revenue generated from coal-fired power generation. The Fund may invest up to 10% in onshore Chinese bonds; up to 10% in non-investment grade rated bonds; up to 10% in convertible bonds; up to 10% in contingent convertible securities; and up to 10% in other funds. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Share class details

Key metrics

NAV per share	JPY 6,331.32
Performance 1 month	3.64%
Yield to maturity	5.28%

Fund facts

UCITS V compliant	Yes
UK reporting fund status (UKRS)	Yes
ISA eligible	No
Dividend treatment	Distributing

Risk disclosures

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance and underlying investments' weightings relative to the benchmark are monitored, but not constrained, to a defined range.
