

HSBC Global Investment Funds

GLOBAL EQUITY CLIMATE CHANGE

Monthly report 30 June 2024 | Share class ACGBP

Investment objective

The Fund aims to provide long term capital growth and income by investing in companies that may benefit from the transition to a low carbon economy, thereby promoting environmental, social and governance (ESG) characteristics. The Fund aims to do this with a lower carbon intensity and a higher ESG score, calculated respectively as a weighted average of the carbon intensities and ESG scores given to the issuers of the Fund's investments, than the weighted average of the constituents of its reference benchmark. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed.

The Fund will invest at least 70% of its assets in shares (or securities similar to shares) of companies of any size that are based in both developed markets and emerging markets, with revenue exposure to climate transition themes.

Companies and/or issuers considered for investment will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies.

The Fund can invest up to 20% in China A and China B-shares, up to 10% in Real Estate Investment Trusts and may also invest up to 10% in other funds.

See the Prospectus for a full description of the investment objectives, climate transition themes, excluded activities and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.

Company carbon data, can often be “partially disclosed”, i.e. partial geographic coverage, or incomplete operational data. Trucost* undertakes analysis and research to assess company reported results. The proprietary Trucost model enables an estimate of total emissions which relies on more than just reported financial data. Where securities are not covered by Trucost, HSBC assigns a proxy value based on the average intensity score of comparable companies.*Trucost are a division of S&P Global; they assess risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors.

Risk disclosures

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
