

## HSBC Global Investment Funds

# ULTRA SHORT DURATION BOND

Marketing communication | Monthly report 30 June 2025 | Share class BM2

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

## Investment objective

The Fund aims to provide short term capital growth and income by investing in a portfolio of bonds and money market instruments, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund aims to have a higher ESG score than its reference benchmark.

## Investment strategy

The Fund is actively managed and is not constrained by a benchmark. The Fund will invest at least 70% of its assets in either fixed or floating-rate income bonds and other similar securities including money market instruments, that are issued or guaranteed by governments, government-related entities, supranational entities and companies, based in developed or emerging markets. The Fund includes the identification and analysis of an issuer's environmental and social factors and corporate governance practices as an integral part of the investment decision making process. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund may invest less than 30% in emerging markets bonds and up to 10% in bonds which have a maturity longer than five years. The Fund may invest: less than 30% non-investment grade bonds; up to 20% in asset backed securities and mortgage-backed securities, 10% in contingent convertible securities, and 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

## Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

Risk disclosures

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
