

HSBC Global Investment Funds

GLOBAL GREEN BOND

Marketing communication | Monthly report 31 July 2025 | Share class ZQ1HEUR

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long term capital growth and income by investing in a concentrated portfolio of bonds that support climate-related or environmental projects, as established by HSBC Green Impact Investment Guidelines, while promoting environmental, social and governance (ESG) Characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. The Fund will normally invest at least 80% in investment grade bonds and non-investment grade bonds and other similar securities issued by government-related entities, supranational entities and companies meeting certain green bond principles. The Fund will invest in developed markets and emerging markets. Green Bond Principles, which are proprietary to HSBC, are used to determine the Fund's investible universe. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. The Fund may invest up to 10% in onshore Chinese bonds and the Fund's exposure to non-USD currencies will be limited to 10% of its assets. The Fund may invest up to 10% in non-investment grade bonds or similar securities, up to 10% in contingent convertible securities, up to 10% in asset backed securities and mortgage-backed securities and up to 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

Risk disclosures

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
