HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CIRCULAR ECONOMY

a sub-fund of HSBC Global Investment Funds, (the "UCITS");
managed by HSBC Investment Funds (Luxembourg) S.A.

Class:AC
ISIN:LU2475494717

Objectives and Investment Policy

Investment Objective:

The Fund aims to make a positive environmental, social and governance (ESG) impact by investing in a concentrated portfolio of companies that actively contribute to the transition to a more circular global economy, based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems, while also aiming to provide long term capital growth and income.

The Fund's ESG rating is calculated as a weighted average of the ESG scores given to the issuers of the Fund's investments, and it aims to be higher than the weighted average of the constituents of the reference benchmark after eliminating at least 20% of the lowest ESG scored issuers from its reference benchmark.

The Fund promotes ESG Characteristics within the meaning of Article 9 of SFDR. More information on HSBC Global Asset Management's responsible investing policies is available at www.assetmanagement.hsbc.com/about-us/responsible-investing.

Investment Policy:

In normal market conditions, in-line with a thematic approach, the Fund will invest at least of 90% of its assets in shares (or securities similar to shares) of companies with exposure to circular economy themes, based in any country, including both developed markets and emerging markets. Circular economy themes may include production and provision of sustainable resources, circular products, circular economy technologies and services, and recovery activities. They are proprietary to HSBC, determined in reference to United Nations Sustainable Development Goals.

The Fund will restrict investment in companies with limited exposure to certain restricted activities, such as: revenue exposure of more than 5% to unconventional oil and gas extraction and nuclear energy; conventional oil and gas extraction companies that derive less than 40% of revenues from activities related to natural gas extraction or renewable energy sources; and electricity utility companies that are not setting and meeting specific milestones for transitioning towards the goals of the Paris Climate Agreement.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. Please refer to the Prospectus for more details on ESG scores, restricted activities and excluded activities.

Circular Economy Themes, excluded activities and the need for enhanced due diligence may be identified and analysed using both HSBC's proprietary ESG Materiality

Framework as well as research & information provided by financial and non-financial data providers.
