Please refer to the Prospectus for further details on sustainable healthcare products and excluded activities. Sustainable Healthcare Products, excluded activities and the need for ESG due diligence may be identified and analysed using both HSBC's proprietary ESG Materiality Framework as well as research & information provided by financial and non-financial data providers.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Concentration Risk** The Fund may be concentrated in a limited number of securities, economic sectors and/or countries. As a result, it may be more volatile and have a greater risk of loss than more broadly diversified funds.

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ◆ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
