

HSBC Global Investment Funds

GLOBAL INFRASTRUCTURE EQUITY

Marketing communication | Monthly report 30 June 2025 | Share class AM3ORMB

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long term capital growth and income by investing in a concentrated, globally diversified portfolio of listed infrastructure shares, while promoting environmental, social and governance (ESG) characteristics. The Fund also aims to achieve a higher ESG score than the weighted average of the constituents of its reference benchmark. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. The Fund will invest at least 90% of its assets in shares (or securities similar to shares) of infrastructure related companies of any size, that are based in any country including developed and emerging markets. The Fund uses a bottom-up quality and valuation-based investment approach. The identification and analysis of a company's environmental and social factors and corporate governance practices is an integral part of the investment decision making process. The Fund can invest up to 20% in China A and China B-shares, up to 10% in other funds, may invest in money market instruments for treasury purposes and up to 25% in Real Estate Investment Trusts. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.

| MSCI ESG Score | ESG score | E | S | G |
|---------------------|-----------|-----|-----|-----|
| Fund | 7.8 | 7.3 | 6.6 | 6.6 |
| Reference benchmark | 6.8 | 6.7 | 5.8 | 5.9 |

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

For more information, see MSCI ESG Ratings Methodology @ <https://www.msci.com/esg-and-climate-methodologies>

Risk disclosures

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.
- Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
