HSBC GLOBAL INVESTMENT FUNDS - CORPORATE EURO BOND FIXED TERM 2027

a sub-fund of HSBC Global Investment Funds, (the "UCITS");
managed by HSBC Investment Funds (Luxembourg) S.A.

Class:AC
ISIN:LU2578823499

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide income by investing in a portfolio of Euro-denominated corporate bonds for a limited term, while promoting environmental, social and governance (ESG) characteristics.

The Fund promotes ESG characteristics within the meaning of Article 8 of SFDR. More information on HSBC Global Asset Management's responsible investing policies is available at www.assetmanagement.hsbc.com/about-us/responsible-investing.

Investment Policy:

The Fund invests a minimum of 70% of its assets in Euro-denominated investment grade and non-investment grade bonds and other similar securities issued by companies in developed markets.

Certain ESG score criteria (ESG Criteria), which together with fundamental qualitative company analysis, are used to determine the Fund's investible universe Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. Please refer to the Prospectus for more details on ESG Criteria and excluded activities.

ESG Criteria, excluded activities and the need for enhanced due diligence will be identified and analysed using both HSBC's proprietary ESG Materiality Framework as well as research & information provided by financial and non-financial data providers. After identifying the investible universe, the Investment Adviser aims to construct a portfolio with a higher ESG score, calculated as a weighted average of the ESG scores of the Fund's investments against the weighted average ESG score of the issuers of the constituents of the reference benchmark.

The Fund is intended to be in operation until end of 30 September 2027 (the "Term Date"). On the Term Date, the Fund will be liquidated, and shares of the Fund will be compulsorily redeemed at the prevailing net asset valuation per share.

The Term Date may be deferred for up to 3 months if the Board of Directors believes it is in the best interest of shareholders.

The Fund will seek to invest in bonds with a final maturity date close to the Term Date, aiming to hold them to maturity whilst actively monitoring and maintaining the portfolio.

As the term date approaches, the Fund's assets will increasingly comprise of cash and money market instruments.

The Fund may invest up to 20% of its assets in non-investment grade rated bonds at the time of purchase.

The Fund may invest up to 10% of its assets in other funds, including HSBC funds and may also invest in bank deposits and money market instruments for treasury purposes. The Fund may hold shares (and securities similar to shares) received as a result of or in connection with a corporate action affecting existing portfolio holdings.

The Fund's primary currency exposure is to the Euro.

The Fund may also invest in derivatives and use them for hedging and efficient portfolio management purpose. Derivatives will not be used extensively for investment purposes. Derivatives may also be embedded in other instruments used by the Fund.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 3 because its price or simulated data has shown low to medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Callable Bond Risk** Any unexpected behaviour in interest rates could negatively impact the performance of callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).
- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- ◆ **Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds.
- ◆ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Interest Rate Risk** When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
