

HSBC Global Investment Funds

CORPORATE EURO BOND FIXED TERM 2027

Marketing communication | Monthly report 31 July 2025 | Share class BD

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide income by investing in a portfolio of Euro-denominated corporate bonds for a limited term, while promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed and is not constrained by a benchmark. The Fund invests a minimum of 70% in Euro-denominated investment grade and non-investment bonds and other similar securities issued by companies in developed markets. The Fund is intended to be in operation until end of 30 September 2027 (the "Term Date"). On the Term Date, the Fund will be liquidated, and shares of the Fund will be compulsorily redeemed at the prevailing net asset valuation per share. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund will invest up to 20% in non-investment grade bonds, may invest in bank deposits and money market instruments for treasury purposes and up to 10% in other funds. The Fund have primary currency exposure is to the Euro. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.

MSCI ESG Score	ESG score	E	S	G
Fund	7.3	7.4	5.0	6.0
Reference benchmark	7.1	7.3	5.0	5.9

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

For more information, see MSCI ESG Ratings Methodology @ <https://www.msci.com/esg-and-climate-methodologies>

Risk disclosures

- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
