HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CLIMATE CHANGE

a sub-fund of HSBC Global Investment Funds, (the "UCITS");
managed by HSBC Investment Funds (Luxembourg) S.A.

Class:BD
ISIN:LU2758078005

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide long term capital growth and income by investing in companies that may benefit from the transition to a low carbon economy, thereby promoting environmental, social and governance (ESG) characteristics. The Fund aims to do this with a lower carbon intensity and a higher ESG score, calculated respectively as a weighted average of the carbon intensities and ESG scores given to the companies of the Fund's investments, than the weighted average of the constituents of its reference benchmark.

The Fund promotes ESG characteristics within the meaning of Article 8 of SFDR. More information on HSBC Global Asset Management's responsible investing policies is available at www.assetmanagement.hsbc.com/about-us/responsible-investing.

Investment Policy:

In normal market conditions, the Fund will invest at least 80% of its assets in shares (or securities similar to shares) of companies of any size that are based in, or carry out the larger part of their business activities in developed markets and emerging markets with revenue exposure to Climate Transition Themes.

Climate Transition Themes may include but are not limited to, renewable energy, energy efficiency, clean transportation and green buildings. They are proprietary to HSBC, determined with reference to the eligible activities of the Green Bond Principles of the International Capital Market Association and the Climate Bonds Taxonomy of the Climate Bonds Initiative.

Companies considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies and the Paris Aligned Benchmark exclusions, which may change from time to time. Please refer to the prospectus for further details on Climate Transition Themes and excluded activities.

After identifying the eligible investment universe, a portfolio is constructed with lower carbon intensity and higher ESG score. When assessing companies' carbon intensity, ESG score and revenue exposure to an excluded activity, the Investment Adviser may rely on expertise, research and information provided by well-established financial data providers.

Climate Transition Themes, excluded activities and the need for enhanced due diligence may be identified and analysed using both HSBC's proprietary ESG

Materiality Framework as well as research & information provided by financial and non-financial data providers.

The Fund may invest up to 20% in China A and China B-shares. For China A-shares, up to 10% through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect, up to 10% in CAAPs and up to 10% in CAAPs issued by any single issuer.

Why is this Fund in this specific category?

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
